## Volunteers wanted for Buzzfest

Terra Cotta Country Store owners Judy Vella and Bob McCloskey will be hosting Buzzfest, an outdoor art and gourmet food show, on their store property for the third consecutive year, Sept. 26-27, 11 a.m. to 5 p.m.

Last year's event relied heavily on the spirit of volunteerism from local youth, organized by the couple's daughters, Isabella and Margie McCloskey, and this year will be no different.

"The young people who gathered were an invaluable addition to the event," said Vella. "They generously helped artisans with setup and takedown, welcomed (the more than 2,000) visitors at the gates, brilliantly painted faces and provided information to guests. Both

artisan and visitors were quick to praise the positive energy the students showed, their diligent work ethic and their contagious enthusiasm."

"Young people actively involved makes all the difference. It is wonderful to see that local youth are prepared to extend themselves in a spirit of volunteerism and share their time and energy to make great things happen in their community" said Vella.

"We are very proud of our daughters and the young people who represented Buzzfest with such class," added McCloskey.

For more information about Buzzfest visit [www.terracottacountrystore.ca](http://www.terracottacountrystore.ca).

Are you changing your lifestyle because of incontinence?

Let us help you regain your confidence and independence

ERAMOSA EPTA PHYSIOTHERAPY

**Did you know?**  
The scientific research clearly shows that physiotherapy should be the first line of treatment for incontinence.

Many people believe that incontinence; the involuntary loss of urine, is a normal occurrence after childbirth or aging. Continence concerns are **common** but **NOT** normal.

Stress Incontinence (SI) refers to leakage that is noticed during a cough or sneeze, when laughing, or during strenuous activities like soccer, jumping jacks, or other aerobic activities. Sometimes women get the sudden and urgent need to get to a bathroom. Urge Incontinence (UI) is the loss of urine that is accompanied by this sudden, urgent feeling.

Leakage may have started off with minimal and tolerable amounts of leakage that occurred with a cough or sneeze, but then leakage can accelerate to amounts that are substantial enough to wear protective padding, continence garments or simply just avoiding activities that were once enjoyed.
