ST. GEORGE'S CATHEDRAL.

THE RE-OPENING TOOK PLACE ON SUNDAY.

Just Eighteen Months After Its Destruction — Large Congregation Present—Bishop Du Moulin, of Hamilton, Preached—Confirmation Service.

love Thy church, O God!
Her walls before Thee stand,
Dear as the apple of Thine eye,
And graven on Thy hand.
For her my tears shall fall,
For her my prayers ascend;
To her my cares and toils be given,
Till toils and cares shall end.

The opening of St. George's cathedral took place on Sunday morning, July 1st, exactly eighteen months after the edifice was destroyed by fire. The interior is not yet complete, but the seating was pretty well arranged, and admitted the holding of service. There was a large congregation present, and the day was a beautiful one. The processional hymn was "The God of Abraham Praise," and this was followed by "Old Hundredth," which resounded joyfully through the cathedral. The lessons were read by dean Smith and Rev. G. L. Starr.

Bishop Du Moulin, of Hamilton, preached from II Timothy i, 6: "Stir up the gift of God which is in thee." The preacher said that the same spirit which had entered into man at the beginning had accompanied, guided and guarded him throughout ages. In times of difficulty, in war, and in peace, the spirit of God visited the people of old testament times. All along the sacred line wherever holy men spoke, they spoke as they were moved by the Holy Ghost. When God commanded the people to erect a house to His glory, the architects were inclued with power. The spirit of the living God filled it and consecrated it to His service. And when it was necessary for the people to assemble and offer prayer and praise, then the same spirit descended upon them. In all the material and spiritual elements which entered into and constituted the tabernacle of God, His spirit was the one controlling power.

Nor has the influence of God's spirit been withdrawn. It can alone account for the magnificent cathedral structures built for eternity. God has put his spirit into the hearts of the contrivers of the present generation to maintain these lasting glories to his name. He has given inspiration to poets, painters and musicians, whose mighty works bear evidence of the abiding presence of the great and enobling spirit of the living God. Nor are warriors needed in these great day's of ours. As He came mightily upon Gideon and Samson and other great champions of antiquity, He has raised up and set forth in the British empire to-day, one great commander whose fame pervades the whole world, to beat down his foes before his face. Well may we say, "Let God arise, and let His enemies be scattered."

God hath not forsaken his people. His mightiest acts have as yet been untold. We should stir up the gift of God that is within us. The temple in which his hearers rejoiced to-day was their spiritual home. They should use it well. The cruel and devouring flames had laid waste their temple and consumed relics that could not be replaced. But thanks be to God that has given us the victory. The people were to be felicitated in having had patience and courage, and having been taught more abundant liberality in making the house of God more beautiful than ever before. May it be to them none other than the house of God, and the very gate of heaven.

In the afternoon, confirmation service was held by bishop Du Moulin, at which sixty-seven candidates were received, fifty from St. George's and seventeen from St. Paul's. At the evening service dean Smith preached. Charles Harvey was soloist, and Dr. Clarke and Mons. Audrieux assisted with violin accompaniment. The musical part of the service was ably conducted by the organist, R. R. F. Harvey. During the day there were many communicants.

BROCKVILLE'S BIG FIRE.

Cossitt Works Damaged To Extent Of $125,000.

Brockville, July 1.—At noon the fire alarm rang out, and it became known that the implement works of Cossitt Bros.' Co. were ablaze. The wind was blowing briskly, and in a few minutes a roaring blaze enveloped the warehouse. In a short time the flames leaped to the brick structure, some 300 feet long and three stories high, containing the business offices, machine shop, paint shop and finishing rooms. The mayor telegraphed to Ottawa and Smith's Falls. The brigade, twenty-five strong, from the last-named town, arrived with 1,000 feet of hose, but danger was then past.

While this was going on the wind was carrying cinders in clouds all over the town, and roofs for a quarter of a mile away at time and again caught fire. At one time St. Vincent de Paul hospital, Victoria school, Hortin school and St. Lawrence hall were on fire, but bucket brigades quenched the flames. A double house belonging to Mrs. Cranston, and residence of Mrs. Fitzsimmons, on Victoria avenue, caught fire and were destroyed, though the contents were saved. The contents of every house for many blocks south of the Cossitt works were removed to places of safety. Adjoining the machine shop the lumber piles took fire, but the flames were kept well in check. Three small residences just across the street were licked up. Fortunately, the foundry and patterns, together with a warehouse full of hay and harvest implements all ready to ship, were saved, so that the Cossitt company will be able to continue to fill their orders. The company's loss is placed at $125,000, with insurance of about [illegible] that amount, while the loss on the other property will be about [illegible], with small insurance. The Cossitt building was erected in 1872, and the firm's business this season is beyond all previous records, so that they were working overtime. The Messrs. C. S. and F. B. Cossitt said they would build again, and build bigger than ever.

NEW G.T.R. SPUR.

Charter Granted to Ottawa, Brockville and St. Lawrence Line.

Ottawa, July 3.—The bill granting a charter to the Ottawa, Brockville & St. Lawrence railway having passed its final stage in parliament, the promoters of the proposed short line between here and Brockville will make a strong effort to initiate the work this year. An application for a dominion government subsidy has already been made, and similar assistance will be asked from those municipalities which are to be traversed by the new line. It will start from Ottawa and branch off at the experimental farm and run through Manotick, Merrickville, Burritt's Rapids, North Augusta and other points to Brockville. The distance will be considerably shorter than by the present route.

An important feature of the new line is that it will bring the Grand Trunk system to Ottawa, as it will provide direct connections with that road at Brockville. The new company is well backed financially, and will at once commence to acquire the necessary right of way for the work.

A Promotion For Dr. Ross.

Hamilton in Toronto clothes. Surgeon-major Duff, of the first battalion Canadian mounted rifles, has been invalided, and is now in Bloemfontein. Sergt. Ross, a trooper in the first battalion and a graduate of Queen's college, Kingston, has been appointed to look after his duties. Dr. Ross was warmly congratulated by his comrades on his promotion.

Among the patients under Dr. De Vibe's care at the moment are Lieut. Vanluven and Gt. Howard. Lieut. Vanluven was slightly wounded at Zand river, but recovered from that, when he showed symptoms of fever. The attack is very light, however, and he is now convalescent.

Pan-African Congress.

London, July 3.—This month will witness a pan-African conference in London with the object of securing increased recognition of the rights of Great Britain's colored subjects. The idea originated with H. S. Williams, a native of Trinidad, whose appeal met with an enthusiastic response, and South west Africa, the West Indies, Abyssinia, and the United States have sent representatives with the view of looking after the general interests of the colored race. The demands will include a thorough system of education and representation and peasant proprietorship, with especial reference to South Africa and the West Indies.

Postal Union Meets.

Berne, Switzerland, July 3.—The world's postal congress is in session here. The congress will take action on the suggestion of erecting a monument to the memory of Dr. von Stephan, of Germany, who was for a quarter of a century at the head of the German postal service, and who suggested the organization of the postal union.

Canadians Go To Shorncliffe.

London, July 3.—Corpl. Cartwright, of the second Canadian contingent, previously of the 2nd Dragoons, Halifax, and Pte. George Campbell, "G" company, first Canadian contingent, who recently left Herbert hospital, Woolwich, have joined the provincial battalion at Shorncliffe.

Cambridge, Mass., is to-day celebrating the 125th anniversary of Washington taking command of the continental army, which event occurred under old Washington elm, Cambridge, on July 3rd, 1775.

Is It The Kidneys That Are Deranged?

If so Uric Acid Poison is in Your System and Your Sufferings Will be Great Until You Set the Kidneys Right.

Dr. Chase's Kidney-Liver Pills Cure All Uric Acid Troubles.

The most painful, the most fatal and consequently the most dreaded diseases of the human body are caused by the presence of uric acid in the blood.

Uric acid is the name given to the foul poisonous impurities which are left in the blood when the kidneys are deranged and unable to perform their duty of filtering the blood.

So long as the kidneys are in perfect health, the uric acid is passed out of the body by way of the bladder and the blood is kept pure and clean.

When there are severe body pains, headache, backache or weakness in the back; when the skin becomes yellow, dry and hard; when the urine contains deposits, is thick, or irregular; when there is stomach trouble and pains about the heart; when you feel weak, dizzy and become languid and despondent, you can put the cause down to uric acid in the blood resulting from deranged kidneys.

The nature of your ailment will be decided by your constitution. The poison left in the blood will find lodgment in the weakest part and set up some dreadful disease. It may be Bright's disease, diabetes or dropsy. It may be the twanging pains of rheumatism. It may be chronic stomach troubles or bladder ailments. Whatever the form of disease this poisoned blood may cause, the cure can only be brought about by setting the kidneys right.

The experience of tens of thousands of men and women in Canada and the United States points to Dr. Chase's Kidney-Liver Pills as the most effective means of setting the kidneys right. No other kidney medicine can produce so much irrefutable evidence of its wonderful curative virtue. No other kidney medicine has received such hearty endorsation from physicians. Nor is this to be wondered at when it is remembered that Dr. Chase is a prince among physicians.

Nature has only provided one means of keeping the blood free from uric acid poisons—the kidneys. Nature's best effective invigorators of the kidneys are contained in Dr. Chase's Kidney-Liver Pills.

Purely vegetable in composition, scientifically prepared from the great formula of Dr. A. W. Chase, thoroughly tested in thousands of severe cases, wonderfully efficient in all diseases caused by uric acid in the blood. Dr. Chase's Kidney-Liver Pills stand alone as the world's greatest kidney medicine. They prevent and cure disease by ridding poisonous impurities from the blood. One pill a dose, 25c. a box, at all dealers, or Edmanson, Bates & Co., Toronto.

HAD A NARROW SHAVE.

ACCIDENT TO THE STEAMER SPARTAN ON SATURDAY.

Her Rudder Chains Parted in the Lachine Rapids—The Boat Was Luckily Beached in a Safe Position.

Montreal, July 2.—The passengers on the Richelieu & Ontario navigation company's steamer Spartan had a thrilling, but fortunately very rare, experience Saturday. As usual on Saturday there was a large number of passengers, and also a big general cargo of freight. The result was that the boat was late in leaving Lachine, and it was growing dark as it approached the rapids. There was a regular gale of wind, and most of the passengers sought shelter of the cabin until as the steamer drew near the rapids they were called out to witness the famous scene. The Spartan was in command of Capt. Grange, one of the most experienced men on the river, and all went well until a short distance below the C.P.R. bridge, when a terrific gust of wind struck the steamer sideways and backed her over to such an extent that she fell off from her course. This necessitated a sharp turn of the helm, and, under the strain, the rudder chains parted. The vessel had at this point a great deal of headway on, and for a few seconds the position was certainly very startling, as the vessel, under the influence of the high wind, and released from the control of the wheel, dashed almost at right angles to her course. Fortunately, as is always the practice on the R. & O. steamers when running the rapids, the tiller at the stern was manned, and the steamer was brought up to her course, Capt. Grange at once proceeding to the tiller and diverting the course from there. He realized, however, that against such a wind and with a crippled ship it was not advisable to shoot the rapids, and accordingly he ran her on a shoal near the property of the Lachine rapids hydraulic and land company. There was naturally a good deal of excitement, and several of the ladies fainted, but the captain went around with a smiling face and assured everyone that there was no danger. The passengers were given the option of going ashore or remaining on board until this morning. About a dozen, for business reasons, elected to leave the ship, and the life-boats having been lowered, they were sent ashore and came into the city by the electric cars. The passengers were nearly all Americans, and there were at least half a dozen bridal couples on their wedding trip.

The boat remains on the rocks, but the officials state that she is not much damaged. They wired to Kingston for wrecking apparatus and expect to get her afloat again in a couple of days. The captain says that the passengers had a very narrow escape, because if the boat had gone a little further she would have been caught in the swift current of the rapids and would have been helpless.

Mr. Tarte Quotes Dilke.

London, July 3.—Hon. Mr. Tarte writing from Paris says: "I am sorry to see some of the English newspapers reproaching us with having made what they call pro-French speeches. It is of the greatest importance that the position of the French Canadians be well understood by our English friends in England and Canada. We are French but loyal subjects of the queen. Sir Charles Dilke put the point nicely and clearly in his last book, 'The English Empire,' when he said in three, or English extract, we are the only races to be recognized as British citizens the empire would not last long as a united empire. In other words all nationalities living under the British flag must be allowed their own homogeneity if we are to stand and live together. Speaking for myself, I don't hesitate to say that British institutions are the best in the world."

Peary Confident Of Reaching Pole.

New York, July 3.—The Arctic steamer Windward, presented to Lieut. Peary by A. C. Harmsworth, of London, will sail from New York this month under American registry, by virtue of a bill recently signed by president McKinley. She will be under the command of Capt. S. W. Bartlett, of Brigus, Newfoundland, who commanded the Diana and the Hope. She will carry the most complete equipment. Her movements, after joining Lieut. Peary, who is wintering at Etah, will be determined by the explorer.

According to Mr. Bridgman, Lieut. Peary's secretary, the lieutenant is absolutely confident that he will reach the north pole this summer.

Russian Navy Addition.

Philadelphia, Pa., July 3.—The Russian cruiser, Varing, will have her official trial this month and will be ready to be placed in commission late in August. The big warship and her battery have been tried in every conceivable way, and not one weak spot found in the construction of her engines and boilers. On her speed trial the cruiser developed twenty-two knots an hour under natural draught, and with one of her boilers out of use, and the Cramps are confident that she can cover fully twenty-four knots when put under forced draught.

"Trek" To The Convention.

Kansas City, Mo., July 3.—Farmers from western Kansas are arriving here to-day and are pitching camps in the suburbs of the city. Large county delegations have come in covered waggons and move in caravans. Many of these delegations intend to spend the entire week in camp. There will probably be in all 1,000 waggons.
