WARNER'S SAFE CURE

FOR THE KIDNEYS, LIVER AND URINARY ORGANS

THE BEST BLOOD PURIFIER.

There is only one way by which any disease can be cured, and that is by removing the cause—whatever it may be. The great medical authorities of the day declare that nearly every disease is caused by deranged kidneys or liver. To remove these therefore is the only way by which health can be secured. Here is where WARNER'S SAFE CURE has achieved its great reputation. It acts directly upon the kidneys and liver and by placing them in a healthy condition drives disease and pain from the system. For all Kidney, Liver and Urinary troubles for the distressing disorders of women, for Malaria, and physical troubles generally, this great remedy has no equal. Beware of imposters, imitations and connections said to be just as good.

HAIR DESTROYER,

ALEX. ROSS'S DEPILATORY removes hair from the face, neck, and arms, without injury. $1 per bottle; sent by post, securely packed, on receipt of price. Wholesale, Montreal Depot, 2 Birch, Kingston, who are both practical men. Mr. Nicol was so well pleased with Ontario that he has bought land and settled there. Mr. Birch, although owning land before coming to Kitwanda, has made another purchase, being quite satisfied after a thorough investigation that the place is all that the Ontario Fruit Grower represents to be.

If a Canadian farmer comes here willing to work and invests in say ten acres of land he will have a better result from five years labour than he would from 100 acres in Canada during the same time besides having a much better climate to work in. At the same time it would be very injudicious for any one to come here or anywhere else expecting that riches will come to him without using the mental faculties and bodily powers with which a merciful Providence has endowed him.

California has no room for such men, and although newspapers may some times mistake facts, still where a person undertakes to correct them, he should endeavour to do so honestly and truthfully.—I remain, yours truly.

JAMES CRAIG.

N.B.—One inch of water to 8 acres means 1 square inch, under a pressure (4 inch) taken as required. For example say 32½ inches for 24 hours, every 30 days for 10 acres of land.

AGAIN ON THE DEFENCE.

To the Editor, British Whig.

DEAR SIR,—I consider it my duty to set that sleepy old gentleman to rights, whoever he may be, and to inform that "Street Observer" that no old gentleman either wrote or dictated one word of that wonderful letter. As for myself I do not desire to countenance anything that would look careless or indifferent in the house of God, but I have been wondering whether the man who feels drowsy and takes a nap is worse than the man who sits in his pew with malice in his heart and score written on his brow, and when the minister reads his text wonders if he did not hear a sermon preached from the same text twenty-five or thirty years ago. In my opinion the latter is the man, and I know him. He that being often reproved hardeneth his neck shall be suddenly destroyed and that without remedy. Proverbs, xxix. However there is every prospect now of a flourishing congregation and why not, as I believe in future they are to be honoured with the presence of a Mormon prophet. If there is one vigorous young minister to be found in the Dominion, imbued with a missionary spirit, willing to go and preach the gospel to the heathen and to suffer persecution and reproach for the sake of the Reformer, no doubt the Presbytery of Kingston will kindly pass him into the seclusion of the Brock Street Church, and he will not be in seclusion very long. I can assure him if he ever should happen to get his salary in full it will appear in the evening paper. I will, when there is occasion, be very doing so, come to the defence of my beloved pastor in the person of Rev. A. Drew Wilson, whom I love in the Lord. My only criticism as to my department in the house of God or elsewhere. So much for the model member of the Brock Street congregation. Yours, &c.,

SPONTANEOUS COMBUSTION.

The Berlin *News* remarks:

"Some people have an idea that there is nothing in the idea of spontaneous combustion. We are certain, however, that there is, and many a building has been burned down, a fire originating by a 'cause unknown,' while the real secret, if known, would be spontaneous combustion amongst rubbish. No person should have old rags or other rubbish in large quantities in good buildings, for there is no certainty that some fine morning their property may be in ashes from spontaneous combustion. This danger has been proved in this Town a few days ago, and only for the good fortune of timely discovery one of our best stores would be in ashes."

A recent case in Kingston illustrates the point exactly. There was the very opposite of any ground for suspicion of foul play and yet the oily rag in the closet. The fire started from the very place it occupied.

LETTERS TO THE EDITOR.

LETTER FROM MR. CRAIG.

To the Editor, British Whig.

SIR,—Before leaving Kingston I promised to write you regarding the soil, climate, etc., of California, but having been unsettled until a short time ago, I have deferred that pleasure until now. In your issue of the 28th ult. I noticed a letter signed "Western Settler," who seems to be afraid of writing above his name, and who seems also to try to give Kingston people and others in the East a false impression of this section of California.

It is quite true that land here would be of little value without water privileges and the Ontario *Fruit Grower* does not dispute the fact, but the writer evidently does not know the amount of water supply, either for Kitwanda or Ontario. Land purchased from Chaffey Bros. entitles the buyers to an interest in the Water Stock Company. In Kitwanda the water supply is 1 inch to 8 acres, and in Ontario 1 inch to 10 acres. This is considered quite sufficient for all purposes.

At Riverside last winter the frost injured a considerable quantity of the orange crop, the severity of the weather being unprecedented.

In Kitwanda oranges showed no evil effects from the frost, thus proving that Kitwanda is well adapted for orange growing. In Ontario at present there is no existence but one orchard which bears annually excellent oranges, which have never been injured by the cold weather. Regarding the water supply of Kitwanda there is at present more than the settlement requires, and as soon as necessary the Water Company can develop another canyon which they now control for like purposes.

In regard to these settlements it is only necessary to give the opinion of two gentlemen who are well known in Kingston, viz., Mr. Daniel Nicol, of Ontario-st., and Mr. Samuel Birch, of McKelvey & Birch, Kingston, who are both practical men. Mr. Nicol was so well pleased with Ontario that he has bought land and settled there. Mr. Birch, although owning land before coming to Kitwanda, has made another purchase, being quite satisfied after a thorough investigation that the place is all that the Ontario *Fruit Grower* represents to be.

If a Canadian farmer comes here willing to work and invests in say ten acres of land he will have a better result from five years labour than he would from 100 acres in Canada during the same time besides having a much better climate to work in. At the same time it would be very injudicious for any one to come here or anywhere else expecting that riches will come to him without using the mental faculties and bodily powers with which a merciful Providence has endowed him.

Exasperated in the night by cats, a Dubuque man went out in his back porch, swung a heavy club to let fly at them, caught it in the long tail of his night shirt, knocked himself down the steps and broke his arm. A man in the same city, while absent-mindedly trimming a tree, sawed off the limb he was sitting on, and was half killed by the fall.

The student of a medical college in New York was called to his home near Cleveland, lately, to attend his dying sister. After the funeral he returned to his studies, and at the first visit he paid to the dissecting room found the body of his sister upon the table and went insane. He is now in an asylum.

Temperance principles are spreading among the lower classes in Britain. The Masonic fraternity have taken the cause in hand, also in a town in Pontiana called Grantville. The men who form the company which founded it are all six feet or more in height, and admit no settlers not equally athletic-mous and with wives 5½ feet high at least.

A panic occurred at a meeting of the Salvation Army, at Haywood, Manchester, England. Two thousand persons were at the barracks, when an alarm of fire was raised. A rush was made for the door, a window was knocked out, and a number of persons jumped to the ground, a distance of twelve feet. Fortunately no one was seriously injured.

In Wolverhampton, England, a woman fortune-teller is wanted by the police for exacting money from a man under promise of producing paralysis in her client's mother-in-law. That is probably about the sharpest fortune-teller that ever breathed. She knew how to tackle a man. A fortune-teller who could go around paralyzing mothers-in-law, at so much per head, ought to make a fair living even in England.

"A man breathes about eighteen times a minute, and uses about three thousand cubic feet, or about three hundred and seventy-five hogsheads of air per hour," says a scientific exchange. Ah, well, that may be close figures for a man under ordinary circumstances, but how about a man chasing and yelling after a fleeing street car. That man ought to absorb about a million hogsheads of air a minute, and it is strange that any air is left in the neighborhood for the rest of humanity to breathe. There is invariably considerable room for debate in these heavy-weight scientific questions.

Oh, What a Cough!

Will you heed the warning? The signal perhaps of the sure approach of that more terrible disease, consumption. GAOL ENQUIRY.

Charges against the Surgeon and Gaoler of the Welland Gaol—Alleged Extortion Practised.

The Inspector of Prisons is investigating the charges which have been preferred against the Welland Gaol Surgeon and Gaoler—that medicines procured for the prisoners were used outside the gaol, that the Surgeon used his office to extort money from the prisoners, that commitments were altered for a consideration, and that frauds were committed in connection with the Surgeon's certificates, etc. The charge of extorting money has a local interest inasmuch as the principal in the case is now serving a term in the Kingston Penitentiary.

Mary J. Anger, wife of Aaron Anger, in the penitentiary, testified that when her husband was awaiting trial in Welland gaol for arson Drs. Kennedy and Schooley visited her at her home in Bertie. Dr. Kennedy proposed to her that it would be well to reduce her husband's health and get him off. $800 was named as necessary for the job. When she told him she could not raise that sum he asked her if her brother Henry could, or if she would mortgage the farm.

A BROTHER'S STATEMENT.

Henry Anger, brother of Aaron Anger, said his brother complained to him of being ill and Dr. Kennedy told him he was giving his brother medicine where by his sentence would be shortened. Dr. Kennedy brought him a letter from his brother, asking him to make over to the doctor a chattel mortgage. He saw his brother and suggested that he should give Dr Kennedy $200, gave him a note for that amount to help his brother and to give him medicine that would make him crazy. The note was given in Dr. Kennedy's office. Dr. Schooley was present. The conversation was to the effect that medicine should be given his brother so that he would not be

NEXT TOWN SELON

Dr. Schooley had as much to say in the matter as as Dr. Kennedy. Witness paid the note to Dr. Kennedy. Dr. Kennedy afterwards asked witness for more money. He said he had been down to Kingston and had talked to a surgeon there. He wanted $400 to $600 and he would so work it that his brother would not be there more than a year. He said he was cousin to the Kingston surgeon's wife and could do better for Anger at Kingston than Schooley. Kennedy had previously promised witness and his brother that he would go to Kingston.

A letter was then read from Dr. Kennedy, asking for money.

SOME MORE CALCULATIONS.

William H. Anger saw the note drawn up. Dr. Schooley was there on the occasion when the conversation was to the effect that they would give his father medicine to make him sick, to reduce his sentence." Kennedy said if this would not work he would go to Kingston. Dr. Kennedy wanted his mother to send the witness to Kingston with him. He also wanted some money or a mortgage on the house.

Further evidence is to be taken on this charge next Wednesday morning at Kingston Penitentiary.

A TURNKEY'S STATEMENT.

Jas. Gilchrusse, turnkey, on another point, laxity of discipline, said the prisoner Rhodes was brought from Kingston to give evidence in a murder trial in October, 1879. Rhodes and his wife were together for several hours, no officer or person being present. The guards had been appointed to officer over him while he was turnkey.

Jas. Baxter said Rhodes asked to see his wife, as he had important family matters to talk over. Witness consulted with Gilchrusse and they compromised concluded to permit it.

Further evidence will be taken at Kingston.

Mr. C. P. Brown, Crown Land Agent, Sault Ste. Marie, writes: "Two or three of my friends and myself were recommended to try Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda, in preference to Compound Syrup of Hypophosphites. We prefer your Emulsion, and think it better for the system than the Syrup," &c.

P. M. Marshall, West Jeddore, N.S., writes: I wish to inform you of the wonderful qualities of Dr. Thomas' Eclectric Oil. I had a horse so lame that he could scarcely walk; the trouble was in the knee, and two or three applications completely cured him.
