Ayer's Cherry Pectoral

FOR DISEASES OF THROAT AND LUNGS, SUCH AS COUGHS, COLDS, WHOOPING COUGH, BRONCHITIS, ASTHMA AND CONSUMPTION

The few compositions which have won the confidence of mankind and become household words, among not only one but many nations, must have extraordinary virtues. Perhaps none ever secured so wide a reputation, or maintained it so long as AYER'S CHERRY PECTORAL. It has been known to the public almost forty years, by a long continued series of marvelous cures, that have won for it confidence in its virtues, never equalled by any other medicine. It still makes the world effectual cures of Coughs, Colds and Consumption, that can be made by medical skill. Indeed, the Cherry Pectoral has readily robbed these dangerous diseases of their terrors to a great extent, and given a feeling of immunity from their painful effects, that is well founded, if the remedy be taken in season. Every family should have it in their closet for the ready and prompt relief of its members. Sickness, suffering and even life is saved by this timely protection. The product should not be expected, and the wish will not. Keep it by you for the protection it affords by its early use in sudden attacks.

BLAZE AT STIRLING.

The Village in Ruins—The Names of the Losers—A Desolate Scene to View.

The village of Stirling was almost completely destroyed by fire on Thursday night. Over twenty buildings were reduced to ashes before the flames could be subdued. The total loss is roughly estimated at $100,000. Several of those who were burned out had no insurance whatever, and many of the residents of the village are left entirely destitute. This conflagration is the most disastrous in its results that has occurred in the county for the last quarter of a century. The fire originated in the shed adjoining the Exchange Hotel, about 11 o'clock, and there being plenty of straw and other light material about the premises, the flames gained such headway before the people got to work to extinguish it that the whole village appeared to be doomed to destruction. The fire soon communicated with the hotel, and consumed the building and contents in short order. It next spread to adjacent buildings, and the people seemed insufficient to cope with it in its march of destruction.

LIST OF SUFFERERS.

A. McWilliams, buildings, sheds and most of furniture destroyed, loss $8,000, insured for $2,000. Martin & Turner's buildings a total loss, stock half lost, total loss $2,500, insured for $300. Dorland Smith's furniture, total loss $500. Robt. Jones, blacksmith shop, total loss $600, insured for $300. Wm. Smith, watchmaker, loss $500. L. Wheeler's carriage shop, totally destroyed, loss $2,500, no insurance. County bridge, loss $300. Dr Youker, furniture, &c., loss $2,000, no insurance. Brick store, owned by J. G. McKenzie & Co., totally destroyed, loss $2,500, insurance not known. John Conley, sewing machines, loss $200, no insurance. James Milne & Co., hardware, totally destroyed, loss $7,000, insurance not known. Milne & Clute, two stores, dry goods and grocery, loss on stock $28,000, insurance not known. James Milne's block, three stores, loss $11,000; insurance not known. R. F. Parker, dry goods, loss on stock $8,000, insured for $1,500, household goods, loss $1,000. Mrs. Judd, buildings, loss $4,000, insured for $1,000. Post Office totally destroyed. Ira Williams, dry goods, loss on stock $5,000, no insurance. Parker & Butler, dry goods, loss on stock $3,000, insured for $1,300. Dr Parker's building, loss $6,000, insured for $1,500. George A. Skinner, solicitor, loss $400. Melinda Carter, dressmaker, loss $1,000. News Argus office, loss $1,500; insured for $600. Mrs. Wheeler, loss on furniture $300. Joseph Green, store, loss $3,000; no insurance. Masonic Lodge, furniture partly destroyed, loss $150. Oddfellows Lodge, furniture totally destroyed, loss $300. James Boldrick, stock, loss $3,500, insured $2,000; building damaged $300. Two houses were burned owned by Nelson McWilliams, of Marmora. Several other small losses not known.

CHECKED AT DATERKEAR.

The fire burned along on both sides of the street—taking everything as it went—from the Exchange Hotel to the bridge, where it was checked. The village presents a desolate aspect. No lives were lost. It was long after day break before the flames could be checked. A thriving picturesque hamlet has been reduced to a waste place, and many families are quite destitute. Men who were well to-do when they closed their places of business and retired to rest last night are now almost penniless.

A MONSTER PRISON.

The largest prison in Europe is the House of Detention, which has just been completed at Berlin. This enormous edifices comprises six separate buildings, to which have been transferred all the prisoners awaiting trial who have hitherto been confined in the various prisons of Berlin. The prison for men consists of a ground floor and four other stories, 752 separate cells, dormitories for 196 prisoners, besides 40 rooms for turnkeys and sleeping accommodations for 118 attendants. Each of the 752 cells has a window 10 feet high. There are six cells in the basement for prisoners who are refractory to discipline, and in the basement are also to be found the kitchens, the bath rooms and the heating apparatus of the prison. The internal part of the prison is constructed of iron, and is so built that all the corridors look out upon a central hall, which commands a view of every cell. The prison for men, which is separated from the rest of the building by a wall 16 feet high, also contains a chapel and four large exercise grounds. The prison for women contains only 110 cells and 15 large dormitories, the latter of which are divided into sections, each containing a bed, which can be locked up every night after its occupant has retired to rest.—*London Daily News.*

AN IRISH CRIME.

Particulars have been received of the attempted murder of a caretaker at Castleisland, County Kerry. Walsh, the caretaker, left the house at 8 o'clock on Monday morning to herd some cattle, when he approached a party in ambush behind some bushes. A shot was fired, which missed its aim, and Walsh turned and ran to the house. Several shots were fired after him, and he received five revolver bullets in the legs. As he got near the door one of the ruffians, Thomas Fleming, put a bullet through his neck. The party then took to flight, but before the ruffian left the ground he was recognized by Walsh, his brother and his sister, who were inside the house. Information was given to the police and eight persons were lodged in Tralee gaol—Thomas Fleming, Michael Fleming, Timothy Kelly, Denis Brosnon (father and son), Michael Collins, Peter Crouin, Thomas Sullivan and Laurence Kelly. The elder Brosnan has turned informer, and the authorities believe they have discovered another branch of the "Invincibles," a secret Association which has caused all the murders and outrages in the neighborhood of Castleisland. It is also stated that Tynan, the notorious "No. 1," was for some time at Tralee, of which he is a native.

William David

is now in business again keeping a broker store in the place formerly occupied by Mr. Donnis, next to Robinson's carriage shop. Wm. David has on hand a large assortment of household goods. All he wants is the people to come in; he is sure to sell. He has a lot of new clothing; tweed suits for $6.75; navy blue and diagonal pants $1.80. 200 doz watch crystals at 10 cents each.

Our Children.

Why compel them to take those vile and nauseating medicines, when Puttner's Emulsion is so palpable and nice, and produces better results than any other. Most astonishing reports are daily recorded in favour of its cures, where other preparations of the kind have failed, and then been cast aside in disgust.

Palpitation of the Heart

Nervous Neuralgia, of no matter how long standing or how severe, will readily yield to the curative power of Dr. E. C. West's Nerve and Brain Treatment. Sold by W. J. Wilson.

REMARKABLE BRIDGE.

Description of the Proposed Canada Southern Bridge Across the Niagara—Big Affair.

The Canada Southern Railroad Bridge over the Niagara River is being built by the Central Bridge Company of Buffalo, under a contract which requires that it be completed by December 1st next, under a forfeiture of $1,500 per day for each day's delay after that date. The design is what is known as the Cantilever Bridge. The Firth-of-Forth Bridge in Scotland and the Fraser River Bridge on the Canada Pacific RR is being constructed on the same plan, which especially recommends itself to a long span bridges that must be erected without false work. The bridge is to be double track and of steel, so as to carry on each track at the same time a freight train of the heaviest pattern, exhausting the entire length of the bridge, heated by two "consolidation" engines, and a safe pressure of 50 lbs. to the square foot, and under this load the structure is strained to only one-fifth of its ultimate strength. The total length of the bridge is 800 feet, supported on steel towers rising from the water's edge. The clear span across the river is 500 feet, and is the longest double truss ever yet built. No expense will be spared on the structure, and the foundations are being pushed night and day by over 100 men. It is expected to be ready for the masonry by the first of July. The excavations are carried down to solid rock, when blocks of "Beton Coignet," twenty feet wide, forty five long and ten feet thick will be put in. Upon these blocks, of which four will be used, will be built masonry of the most substantial kind, carried up 30 feet above the surface of the water, and on these the steel towers will rest, rising 160 feet above the masonry, and these will support the steel superstructure. Every ingot of steel is subjected to both mechanical and chemical tests, and by this powerful machinery the steel, having a strength of 80,000 pounds per square inch, is cut, bored, punched and planed with the greatest ease. The shore end of the cantilevers will be firmly anchored to the masonry to constitute the counter weights to balance the unequal loading on the river arms. Over three years were required to complete the present suspension bridge with only a single track, and if the Canada Southern bridge, with its double track, can be finished within seven months and a half it will certainly show that great strides have been made towards the proficiency of bridge engineering, or may be this contract does not offer the usual facilities for "jobs" in the building of large structures.

WOMEN AS STUDENTS.

Many professors have written letters to the President of the Harvard College Annex (the separate college for women Mrs. Agassiz) setting forth their views of their usefulness, possibilities, and characters and abilities of the students. Prof. John William White says: "I have met uniformly great earnestness, persistent industry and ability of high order. It is an inspiration to teach girls who are bright and so willing."

Prof. Louis Dwyer says: "I have been most struck this year in my philosophical course with the entire absence of intellectual indifferentism on th part of the young ladies. Their questions have been most intelligent, and where the first answer did not satisfy them, persistent—an encouraging sign that they are unwilling to contract themselves with words."

G. H. Palmer, Professor of Philosophy, writes that the girls are keener questioners than the young men students, and he finds himself unable to account for this superiority.

Another professor writes: "I find on comparing notes with other instructors in my own department that their experience agrees entirely with mine. Their annex classes do excellent work, and almost without exception average better than the corresponding classes in the college.

Another says: "The qualifications of women for collegiate instruction are no longer a matter of debate. I say most emphatically that the power of the female mind for receiving and digesting the subject of their studies is full equal to that of men.

They Speak for Themselves.

Picton, Feb. 17. This is to certify that I have used Polson's Nerveine for Rheumatism and have found it a valuable remedy for all internal pain, and would greatly recommend it to the public. N. T. Kennedy.

Leeds County, Jan. 8.—We are not in the habit of puffing patent medicines, but we cannot withhold our testimony as to the great value of Nerveline as a remedy for pain. We have pleasure in recommending it as a never-failing remedy. Rev. H. J. Adams, Banc. Dennison, and many others.

P. A. Churchill states—There seems to be no end to the success of Nerveline. I send you a few testimonials, and can send you plenty more if of use to you.

Headache.

Headache is one of those distressing complaints that depends upon nervous irritation, bad circulation, or a disordered state of the stomach, liver, bowels, etc. The editor and proprietor of the Canada Presbyterian was cured after years of suffering with headache, and now testifies to the virtue of Burdock Blood Bitters.

Convincing Proof.

The attention of readers is respectfully called to the advertisement of the Puttner Emulsion Co., appearing in this paper. Convincing proof is there given of the unbounded popularity of their valuable proprietary medicine which cannot be gainsaid.

VITAL QUESTIONS !!

Ask the most eminent physicians

Of any school, what is the best thing to the word for quieting and allaying all irritation of the nerves and curing all forms of nervous complaints, giving natural, healthful refreshing sleep always?

And they will tell you unhesitatingly "some form of Hops."

CHAPTER II.

Ask any or all of the most eminent physicians

"What is the best and only remedy that can be relied on to cure all diseases of the kidneys and urinary organs such as Bright's disease, diabetes, retention or excessive or retain urine, and all the diseases and ailments peculiar to Women."

"And they will tell you explicitly and emphatically "Hops."
