Daily British Whig.

Office, 162 Ontario Street.

MONDAY EVENING, AUGUST 27, 1883.

The death of Mr. Price, of Elstree, makes another vacancy in the Senate. Three Ontario and two Quebec seats are now vacant, namely: In Ontario, those of the late Senators Brouse, of Prescott, Hamilton, of Kingston, and of the present Lieutenant-Governor of Manitoba; in Quebec, of the late Senators Fabre and Price.

A telegraph striker testified before the Senate Committee in New York that there had been 2,832 strikes in Europe since 1870, and that of these contests only 72 were won by the strikers, 189 were won by the employers, 91 were compromised, and the rest, 2,000, are supposed to have been lost by the strikers. During the ten years, beginning with 1870, the European strikers had lost in wages $21,257,750. This resume does not come from the capitalist side of the contest, but from a striker. No one has come forward to challenge the truth of what he said.

In the Muskoka election trial the judges have declared two men guilty of corrupt practices and the agents of Mr. Pauquier, the sitting member. They have also decided that votes were illegally polled in unorganized townships by those who had not property enough to qualify them in the regular way. If there is a scrutiny a large number of votes will be struck off under this decision, which was on a test case. The judges have intimated that Mr. Shields and others will probably be declared Respondent's agents. Later—The Respondent, Mr. Pauquier, has been unseated and mulcted in costs.

A DIVORCE COURT.

At the last session of the Dominion Parliament a certain case came before the Senate. A man sought separation from his wife, and a Special Committee heard the evidence for and against the petition. Such was the scandal which reached the press, such the unsavory statements made by the respective sides, such the publicity which the Senators gave to matters that should not have gone beyond the circles particularly affected thereby, that Hon. William McDougall, Q.C., the wife's counsel, declared that Canada should have a Divorce Court, and the Wasp and other journals though the time had come when the subject could stand discussion. Since then public opinion has not been influenced in any way, and it surely never will favor a Divorce Court if American practices are imported into Canada.

The New York *World* has devoted a great deal of space to an exposure of the infamous methods by which the matrimonial tie has been severed "speedily and without publicity." Within 10 years hundreds of once happy families have been broken up simply because the mother wasted money and wore rich dresses, or the father grew tired of a quiet life, or became enamored of some other woman whom he met on a pleasure excursion or at a dinner. This infection, it is believed, extends only among actors and actresses, but every lawyer knows that the story of Osmond Tearle is repeated every day in private life. Boston and Philadelphia have always held the lead in the matter of divorces, but New York is gradually and surely becoming the city where divorce lawyers thrive the best. The *World* explains:

"A man who wants to separate from his wife goes to a lawyer and represents that he is divorced. Why, the specialist will not even inquire. The specialist does all the work, requiring the husband only to sign the affidavits. A private detective and a woman are then employed. The detective armed with a summons goes out with the woman to some resort, having been paid by the lawyer to be at this spot at a certain hour. The detective presents her with the summons, his companion pointing her out as the wife of the man who is seeking divorce. Of course the summons is torn up and the receiver thinks no more of the matter. Meanwhile the matter goes to court. The detective swears he served the plaintiff's wife, and his accomplice swears that the woman pointed out was the defendant in question. The court orders a Referee to investigate the matter. The defense puts forward no witnesses and the Referee recommends an absolute divorce. The court grants the order and the plaintiff is free, while she is ignorant of the fact that a suit has been begun and she is separated forever, perhaps, both from her husband and her children. This is the commonest method of winning a divorce suit, as the specialist calls it.

"There are other methods employed, however. Very often a woman seeking a divorce hires another woman of low character, who meets her victim and visits several places the object of concealed witnesses. The husband in many cases employs the same means to destroy his wife. The wife is met by some other woman while out shopping, and induced to go into a fashionable millinery shop and there both indulge in wine. Two gentlemen are introduced by the lady of the house. The decoy is led away and the wife is followed by the detective who has been watching her to secure reasonable evidence of guilt.

"Very often families are broken up by the love of a young wife for dress and pleasure. Not long ago a clerk in the New York Post-Office was divorced from his wife on the ground of unhandsomeness. The clerk married a pretty girl who showed a liking to excursions and silk dresses. Finally she went out late at night. The clerk surrendered his position and devoted all his energies to drawing aside the veil that enveloped the actions of his wife. His father and brother watched the woman with him until conclusive evidence was obtained and a divorce secured.

"Hundreds of young men blame the easy means of obtaining a divorce as the cause of their misfortune; for the girl knows immediately that her husband will obtain a divorce, and then she can have her dresses and finery. As to another marriage, it never troubles her. She has but to go to Jersey, become a spotless girl, and she will soon find a husband where the laws of New York are powerless to affect her.

If the establishment of the Divorce Court in Canada means the introduction of such experiences, long may its creation be deferred. Better that the Senate remain a sort of family inquisition, that an occasional case should endure a wrong, then that the machinery should be provided for the spread of dissension and disgrace.

A CHURCH SENSATION.

Position of Dr. Wilson, Affected on Account of the Salvation Army Facts in Brief.

Surprise was created on Saturday by the rumour that the position of Rev. Dr. Wilson, as Curate of St. George's, had been affected by his connection with the Salvation Army; that rumour was strengthened by the remarks of the Dr. at Saturday night's meeting. This being a matter in which the people of all denominations are deeply interested, in which the people of the Province are much concerned, we have endeavoured to get at the facts. We learn that no action has yet been taken to remove Dr. Wilson, nothing has so far occurred to affect the place which he has so long and honorably held in the Cathedral. It is understood, however, that pressure has been brought to bear upon the Very Rev. the Dean by some in the Cathedral, and some outside of the congregation and even the city

TO HAVE DR. WILSON REMOVED.

The Dean, we believe, laid the matter before the Bishop and His Lordship has written to say that the question is entirely in the control of the former. If the Bishop advised against the Dr. his action might be regarded as the cause of church dissension; if he advised in favour of the Curate it might be inferred that he endorsed the Salvation Army and this he does not do. Thus the difficulty rests, and we are assured that the Dean does not contemplate action—unless stronger influences are employed than have been exerted up to this time. Dr. Wilson claims that his connection with the Army has not in any way weakened the Cathedral. He is prepared to show this by statistical and other evidence. The Dean is understood to agree with the statement. It is also said that he encouraged Dr. Wilson when he first

WENT INTO THIS SPECIAL WORK.

The Dean admits that such has been the case, but he adds that he did not think his Curate would go so far. Dr Wilson occupies a position which is unpleasant, but in which he has the sympathy of the public. They recognize the fact that he has been acting honestly for the promotion of religion and for the welfare of the Church, and they do not see how he can retract anything he has said. The hope is universally expressed that he may not be pressed into further embarrassment, and that the crisis may be happily tided over. His long service to the Church, his popularity in the city, the exceeding usefulness of his career—all these things should weigh in his favour and resist the opposing influences. Of course Christ Church, Catarraqui, being connected with St. George's, a sensation in the city would be followed by another in the county. We do hope that the outlook will not be as dark as it appears.

MIDLAND CENTRAL FAIR.

The Directors of the Midland Central Fair met at the Treasurer's office on Saturday, for the purpose of appointing judges at the coming exhibition, etc.

Communications from several parties as to special attractions were considered, but it was decided that the bicycle race was all that could be safely ventured on the present year. This was fixed for the Wednesday (weather permitting) at 2 p.m., to be open to the amateur bicyclists of the province, and it was arranged that there should be a first, second and third prize, consisting of silver cups of the respective values of $15, $10 and $5, (since been increased by private subscription to $20, $15 and $10.) Mr. Walkem and the Secretary being deputed to select the prizes. The entire management for the race was left in the hands of Mr. Walkem, who was empowered to engage such assistants as he might think necessary to keep the track clear and afford the bicyclists fair play. Five to start or no race. Entries (free) to be made with the Secretary on or before Monday, the 1st Oct.

The appointment of Constables was left to the President and General Superintendent (Mr. John Simpson), who were instructed to engage none but thoroughly efficient men, the pay being fixed at $1.50 per day, the men to board themselves.

The "Manitoba" Building is to be fitted up as an office, for Secretary, Treasurer, etc., so as to prevent the crowding and inconvenience of former years. The refreshment booths (three in number) are to be sold by public auction, of which due notice will be given, purchasers to erect their own booths. the "Mechanics' Hall" will be reserved for the exhibition of carriages, etc., which will be very large.

A Committee, consisting of the Sheriff, Hon. G. A. Kirkpatrick, M. P., A. Gunn, M. P., and J. H. Metcalfe, M. P. P., was appointed to canvass the citizens.

Special arrangements have finally been made by which return tickets, good for the week, will be issued at all stations on the Grand Trunk Railway at a fare and a third, and on the Kingston and Pembroke Railway at single fare. Articles for exhibition will be carried to and from Kingston by both lines at single rate, provided they remain the property of the original exhibitors.

A PRIVATE AFFAIR.

This afternoon the Police Commissioners met and transacted some business in the Mayor's Office. Afterwards the men were paraded, and, beginning with Sergt. Carson, an investigation of something of that nature occurred. The door was locked as each man was taken in. A Wasp representative was on hand but as the outlook was that he was not desired to hear what the policemen had to say he left.

A SAD MISHAP.—Rev. Mr. Irvine, of Brownsville, but whose relatives live at Barriefield, met with a mishap recently. A light shower having begun to fall he opened his umbrella and his horse took fright. Being unable to manage him Mr. Irvine jumped from the buggy, and the horse going at break neck speed, completely smashing the buggy. Rev. Mr. Irvine was not severely hurt, but received a good shaking up.

Capt. Callaway, of the schr. Mystotes, is again in port, after an absence of three seasons. The Captain is a jolly good fellow, one who has had few accidents during his 14 years' service. He attributes this to the fact that he has seven brothers-in-law, all newspaper men. For several seasons he has been in the ore trade on the upper lakes.

The prop. Prussia arrived from Chicago on Saturday afternoon with 18,000 bush. wheat. She lightened about 8,000 and proceeded to Montreal. LATE LOCAL NEWS.

A WANT OF GAS.

It looked for a white on Sunday evening as if there would be no gas light for the churches. Those which began service at 6.30 had no supply to start with, but it was light enough at that time to do without it. There was consternation at the seven o'clock openings, however, for a darkness had set in that could almost be felt. Here and there a coal oil lamp, procured in a hurry, shed a small glare, just enough to demonstrate how futile such a light is and how useful gas really is. The service was delayed for five minutes in nearly all the churches, the ministers, wardens and sextons being in excited consultation, whether it was best to dismiss with a very short service, or wait a little longer. Micawber-like, for something to turn up in the shape of a gas pressure. About five minutes past seven on came the gas, and though there was not pressure enough for all the centre light, or for the back lights at the pulpits in some cases, the congregation generally could see very well. Those in charge of the gas house must have a care; the churches just now are in no humour to be trifled with.

ACCIDENT AT GANANOQUE.

On Saturday afternoon a melancholy accident occurred at Gananoque. We cannot secure much information, beyond the fact that George Britton, a son of Freeman Britton, editor of the *Reporter*, was standing on a pier built for the new railway and that he was struck by a derrick and knocked over. He fell in such a way as to break his neck. The young man was 17 years of age. We cordially sympathise with the bereaved friends. His mother and father were at the Camp Ground when the news of the fatality reached them, and the shock was a grievous one. A telegram this afternoon reads as follows:

Gananoque, Aug. 27.—On Saturday afternoon George Britton, son of Freeman Britton engaged on the engineering staff of the railway, accidentally happened, while taking levels at the new iron bridge, to be struck by a derrick. Deceased struck a rock, causing the neck to break. Death was instantaneous. Funeral this afternoon. Friends have the sympathy of the entire community.

John Blair was charged with carrying a revolver. He was arrested by P. C. McCormack while flourishing it. Blair, who is a respectable farmer, said he had drank three glasses of beer and did not know what he was doing. The revolver was confiscated and he gave bonds to keep the peace for six months.

William McConaghy, for assaulting T. W. Austen on Friday night on the corner of Princess and Barrie Streets, was fined $5 and costs.

HE STRUCK OIL.

A man named Gee, who keeps a store on the road from Tamworth to Arden, had a keg of butter stolen a few days ago under peculiar circumstances. A party of foreigners came to his house and while one engaged him inside the others attacked the root-house where the butter was stored and made away with it. The tub, almost empty, was afterwards discovered. It was learned that the butter was removed from the keg by a fork or the fingers of "the cook." Gee says they will strike hard against lead the next time they practice "moonlight" work with him, and he means it.

FORMING A COMPANY.—A despatch says the Napanee Glass Works owned by John Herring, are likely to continue inoperative unless a Company can be formed. It is hoped the effort will prove successful.

Testimonial from Capt. Joshua Harper.

SACKVILLE, N. B., Feb. 13, 1877.

J. H. ROBINSON, Esq., St. John, N. B.

Dear Sir,—Early in October last I took a severe cold which settled on my lungs. After having a bad cough for about six weeks I had a very severe attack of bleeding from the lungs while on a passage from Queenstown to Dover. I had daily spells of bleeding for some days until I lost about two gallons of blood, and was so weak as to be scarcely able to stand. I put back to Queenstown, where I received such medical assistance as enabled me to get home.

I saw an advertisement of your Phosphorized Cod Liver Oil Emulsion in a paper. I immediately sent and got half a dozen bottles, after taking which I feel myself a well man again. My weight, which was reduced to 120 pounds, is now up to my standard of 153 pounds. Seeing what it has done for me I can confidently recommend it to others afflicted with lung diseases.

Yours very truly,

(Signed) JOSHUA HARPER,

of the barque "Mary Lowerison."
