Hancock's Inspirator

IS THE MOST ECONOMICAL APPLIANCE KNOWN for feeding boilers or pumping purposes on account of the great range of additions and the small expenditure of steam required for working it. It is intended to take the place of Pumps and Injectors and may be used in the stead to great advantage. It differs materially both in its

Construction & Working Qualities

from the class of boiler feeders known as injectors inasmuch as it has one set of tubes for lifting and another set of tubes for forcing water, a combination entirely new, reliable and efficient. They are simple to operate, always ready for use and altogether a very reliable feeder for boilers.

PAMPHLETS OF INSTRUCTION furnished on application, also testimonials if required. We guarantee every Inspirator according to recommendation or no charge

BE WISE

And SECURE YOUR BUILDINGS and contents from the effects of lightning, so prevalent in this country, by erecting thereon the LONDON GLOBE PATENT COPPER LIGHTNING ROD, the safest and best known to scientific men as shown by the late practical test in London made by W. M. CAIRNS, ELECTRICIAN, LONDON, MANAGER DOMINION TELEGRAPH COMPANY, and also during the month of August last when in or about $75,000 worth of property was destroyed by lightning in the County of Middlesex alone, as well as in many other places through the Dominion. Yet not one case occurred where these rods were set up, although thousands were in use all over this country. The COMPANY HAS OFFERED $500 to any person who can prove otherwise, and the DOMINION INSURANCE CO., OF HAMILTON, will now insure property where these rods are erected for ONE-TENTH LESS, when application is made by this Company or their authorized agents. One or two good reliable agents wanted. Apply to J. BROKENSHIRE, Head Agent for Kingston District.

N.B.—A good variety of WELL PUMPS of the most improved kinds kept on hand. FELT ROOFING also done on the shortest notice.

BE NOT FORGETFUL.

Some folks believe in angels
A prowlin round on earth
Experience teaches me better—
Yer may take it for what it is worth.

Las' night a dreamy-eyed creature
Crep' up in the darkness an' said,
"Please gimme me a quarter, mis'er,
Ter pay fer a supper and bed!"

I looked at him sharp and I thought
I saw a strange light in his eyes,
An' a sudden thought came upon me—
'Twas an angel chap in disguise?

So I reache down my breeches
An' give him my last stray dime
An' he crep back in the darkness,
A blessin me all the time.

A calm like peace came upon me,
An' blessings rung in my ear,
Till later in night I run across
That thar angel a guzzlin' beer.

Arter all it done me more good
To give to that thirsty moke
Then it he'd ha' been an angel
A playing a practical joke

DOMINION EXHIBITION.

AN AUSPICIOUS OPENING TODAY SPICE AT THE GROUND FAST TAKEN UP

The Manitoba Exhibit—Arrival of Live Stock Delay by the Way General Observations.

(Monday's Evening Edition.)

This morning, at 9 o'clock, Manitoba Hall was thrown open to the public, and all day it has been a popular resort for hundreds. "We have come the longest distance, said one of the gentlemen in charge, "and we are first to show our exhibit." There was general admiration expressed at the display, and many a person who previously looked upon Manitoba and the North-West as the abode of Indians and half-breeds, retired from the hall convinced of one thing, that every kind of grain, vegetable or fruit can be as successfully grown there as here, in fact, that the people of the North-West do not live on cornmeal and wild roots. The building in which the exhibit is shown is really handsome. It stands forth fresh from the builder's hand—Mr. R. Mowat—and he certainly has evinced much taste in its erection. The ends and sides are emblazoned with the words "Manitoba Hall" in black and red letters, upon white cloth, so that none can mistake it. On entering one is struck with the admirable way in which the exhibits are shown.

THE DISPLAY OF CEREALS.

Between the four main doors (two on each side) is a raised platform, arranged so that the one tier rises above another. The ceiling of the hall is hung with tarletan in red, white and blue. Depending from the centre post is a fine collection of hop vines, grown near St. Andrew's, the bunches being full of well developed flowers. The cultivation of hops promises to be extensively gone into by the farmers of our western country. On the opposite side are wild vetches or tares, and pea vines. Both are worthy of inspection. On the top tier are the native grasses, and wheat and other grains in sheaves.

THE NATIVE GRASSES

are an interesting feature of the exhibition and will be especially examined by our rural population. These grasses are excellent for feed and are reaped in abundance. Among the varieties are the beautiful feather grass, purple top, alkali, Scotch beaver, wild rye, champion, wire grass, fine horse grass, three cornered native blue grass, wheat grass, brown top, wild timothy grass, sedly grass, large rye, highland swamp grass, red roots, bog, fine blue, swamp seed, brush seedy grass, bone grass, &c. These varieties were collected principally in St. Andrew's by Wm. Pruden. These grasses range in height from two to five feet. Excellent specimens of cultivated timothy are shown. It has been the prevailing opinion that timothy could not be raised on prairie land, but such an impression is evidently erroneous, as the sample shown is really good, some of it four feet long. It was grown in the Boyne settlement and is considered a profitable crop.

THE GRAIN PRODUCTS.

The gentlemen who have charge of these exhibits declare that for the production of grain Manitoba is entitled to the palm, and certainly the display confirms this opinion. White Russian wheat is shown that has obtained a height of 5 feet 6 inches. The straw is excellent and hardy, and the berry plump and firm. This wheat has only been in the west for three years, having been specially secured in Russia by a prominent Winnipeg firm. It has now become one of the most popular grains in the Provinces. A sheaf of Scotch fife wheat stood 5 feet 6 inches. This is another popular grain, a grand flour producing article. The sowing of this seed will be encouraged amongst the farmers and a large amount of seed is to be imported by the Government for distribution amongst them. Another specimen of wheat extensively cultivated by the Mennonites is the "Odessa Red wheat," a sample of which, sown in new ground on June 15th, is worth examining. Another specimen of wheat is the "Converted Scotch wheat"—that is a wheat cultivated from a spring to a fall wheat by continuous sowing. It was secured near Selkirk. The other wheats exhibited are the Lost Nation, Champion, Norway, and White Fife.

In oats a sheaf of New Zealand stands 5 ft. 6 in., very fine. Besides it there are Odessa gold oats, and Black Tartar oats. The grain is both in sheaf and in bags. Its cultivation is quite extensive and profitable. Chevalier barley, 5 ft. high, is shown. It is bright in appearance. The cultivation of barley is not extensive in Manitoba. Flax, sown on June 1st and June 26th on the newly broken sod, is well developed. It comes from the Mennonite reserve. Even in that far western land Oscar Wildeism has penetrated, and the glorious sunflowers, 9 ft. high, are massive and imposing in appearance. The yellow fringe has wilted and nothing but the dark seeds remain. Peas, both in pod and vine, and beans are exhibited. Native hemp, in its green state, is another novelty, and alongside it is a quantity of tobacco in seed. This is not inviting to the visiter. Fine sheafs of Alsike and red clover, 8 ft. high, are among the collection. A good sample of millet is also shown in the straw.

SPECIMENS OF THE WOODS.

A large collection of the various kinds of wood is among the exhibits. The prevalent opinion abroad was that there was nothing but small clumps of willow and white poplar. Although wood is scarce in some sections, still as a general rule there is a well regulated supply throughout the country. The plains abound with wood in clumps, and in other parts there are tracts of forest so evenly interspersed that farmers can generally attain a good wood lot in close proximity to their prairie farms, besides which the lots along the river are covered with good wood. The samples shown are oak, from the Assiniboine, 3 feet in diameter, and spruce from Lake Winnipeg, as well as cotton wood, white willow, soft maple, elm, black poplar, oak, birch, balm of Gilead, red cherry, high bush blueberry, black cherry, white ash, plum and white poplar.

The minerals and stones from our prairie province are very interesting to study. An excellent building article from Selkirk is white limestone. It is largely used. The gray granite from Rat Portage is not inferior to Scotch granite. A petrified fish from the quarries of Bryden & Robinson, Little Stoney Mountain, is certainly a curiosity. The country around the Lake of the Woods furnishes fine exhibits of gold, iron silver and copper ore, and gravel, sand and lime for building purposes. The sand from Lake Winnipeg is very white and excellent for plaster. Rev. Mr. Silcox and David Smith, of Winnipeg, are large exhibitors of minerals. The latter gentleman has a magnificent display. Rev. Mr. Silcox shows agates, amethysts, copper, gold, silver, galena, graphites, iron, coal, jaspar, Zincblend, fossil wood, asbestes, galena in pocket of Zincblend. These ores come from Thunder Bay, St. Joseph's Island, Saskatchewan Valley and other parts of the Province. The lime rock was beautifully slacked when it reached here, the result of contact with the air. The bricks show that clay is available in Manitoba with which to make them.

VARIETIES IN VEGETABLES.

The display of vegetables is very good. The season is later in Manitoba than in Ontario and in consequence the exhibit is not what it would be later on. All the roots and vegetables have been pulled upwards of three weeks. In transit some have been injured. The samples have been neatly arranged on the shelves below the wheat and grasses. In cabbage, there are four or five varieties, one going 27½ lbs. The smaller ones are excellent for eating and pickling. The cauliflowers are fair, but cut too early. They have been grown to weigh 15 lbs. Of potatoes there are three kinds. Early Rose, Beauty of Hebron and White Elephant. They are large and unblemished. The soil of Manitoba makes them thrive. Mangolds are fair, but plucked too early to show their real size. Beets are long and round and of good color. Five varieties of onions hold a prominent place. They are a backward crop. The celery is fair, but damaged by the long journey. The bleaching of this vegetable is done in winter in cellars by the use of sand. The plant also grows there notwithstanding the coolness of the atmosphere. Rhubarb is shown late in the season. There are citron 15 lbs. in weight; squashes and pumpkins, (fair); radishes of huge size; Khole rabbi, cucumbers, vegetable marrow; early varieties of carrots, parsnips of two kinds showing up well; tomatoes, just ripened when the exhibits left so that the display is meagre; samples of corn in the straw and in the ear, though not a success in Manitoba and only grown in gardens. A sample of squaw or native corn is shown. Mr. Riddell says that the land is more adapted to wheat than to corn, consequently people find the wheat raising much more profitable. Four or five varieties of turnips are exhibited. They are excellent considering that they were planted only in June last. The Swedes are worth viewing. Taken altogether the display of vegetables is very meritorious.

WHAT IS SEEN IN FRUIT.

The fruit display is most extensive. There are good samples of crab apples and plums. Apples cannot be successfully cultivated. More harden varieties than those shown will have to be secured. The trees from the east and south, grow luxuriantly in Manitoba soil, running to wood. The frost coming in early kills the young shoots and often destroys the trees themselves. Plums, both wild and tame, are grown in profusion.

SAMPLES OF THE SOIL.

Alongside of the production of the soil will be seen samples of the soil itself. The cases are filled with the virgin earth from Boyne settlement, Selkirk, Portage la Prairie, Brandon, Niverville, the Mennonite settlement east, together with a sample of cultivated city soil from the garden of Mr. A. M. Brown, City Clerk, of Winnipeg, and formerly of Kingston. The soils were carefully secured. If the ground is like that displayed there is no reason why great crops should not be reaped. Samples of prairie soils are also exhibited. They resemble real Irish bog.

Chisholm, Jones & Co., Winnipeg, the pioneer barbed wire manufacturers exhibit a specimen of their wire.

The proprietors of the pioneer broom factory have an assortment of their wares.

Brown, Oldfield & Co. display some artistic vases and flower pots. Samples of flour were sent from the Ogilvie Milling Co., and Capt. D. H. McMillan. Some gilt edged butter was sent from the creamery of James Walker, Stonewall. "The North-West Farmer," the pioneer agricultural journal of the country is also noticed among the exhibits. It well represents the Canadian North-West.

ENTIRE LIST OF ENTRIES.

The following is the entire list of entries:

Joseph Williams, Stonewall, one piece of limestone.

G. A. Glines, a view of the town of Morris. Exhibition, 1881.

Department of Public Works, Winnipeg, map of Province.

A. Doidge, Selkirk, flour pot and two drain tiles, also one glazed ware jar.

Wm. Hespeler, Winnipeg, specimen of soil from Niverville, Mennonite Reserve, Tp. 7, R. 4 E.

Hudson's Bay Company, Winnipeg, sett of three maps of their lands.

A. M. Brown, Winnipeg, cultivated soil, Winnipeg.

Griffith & Knight, Winnipeg, sewer pipe, drain tiles and stone work, 8 pieces.

Wm. M. Kennedy, Tobacco Creek, Section 16, Tp. 5, R. 6, W. 2 varieties of Marigold, 1 bag Red Fife wheat.

George Lawson, Tobacco Creek, 1 bag timothy seed, 1 sheaf horse beans, 1 bunch native hops, flag seed.

Mr. Harley, Portage, white winter radish.

Mr. Allen, Portage, crock of butter, 16 lbs.

George A. Messenger, Brookside Cemetery, cabbages, onions, long blood beets.

Wm. Clark, St. Vital, Beauty of Hebron potatoes.

Ogilvie Milling Company, patent process flour.

There are in all three hundred and twenty one entries.

WHAT A MONTH WOULD DO.

The Winnipeg *Free Press* reports that a number of the leading farmers of St. Andrew's, Kildonan and the west, who had gathered to assist in dispatching the exhibits, were heard to say:

"If we only had a month longer to get up an exhibit remarked, one, we could give the people of Ontario a pointer."

"Yes," replied another, "they'd soon be all 'pointing' their noses in the direction of Manitoba, the country which beats them all for agricultural productions."

MEETING OF THE COUNCIL.

On Saturday afternoon the Council of the Agricultural and Arts Association held a meeting. There was a good representation of members present.

The Evangelical Alliance asked for leave to erect a tent on the grounds, and for the admission of active workers. The request was granted. Passes were given to eight persons.

Messrs. Drury, Bykert and Legge were appointed a Committee to prepare an address to Hon. J. H. Pope, Minister of Agriculture. The hours for the meetings of Council were fixed for 10 and 3 o'clock daily

NOTES TAKEN THIS MORNING.

This morning was taken up by arrival of exhibits, and which after awhile vehicle after vehicle driven into the grounds heaped with goods. Every department was in a state of chaos, but before night order is expected. Kingstonians will have numerous exhibits on the grounds. The gates were not opened this morning to the public, but probably this afternoon late there will be admission. The Secretary was engaged all forenoon in receiving entries. Those who have delayed until the last moment have some very plausible excuses to offer for now asking favours. The number of exhibitors is very large. The cattle are nearly all on the ground and they will make one of the grandest displays ever seen here. They are of all grades and conditions, their like the people of Kingston have not before beheld. The equine display will be attractive. The sheep pens are all filled. Pigs are on hand in large numbers, in fact the live stock in every section shows up well.

The Palace promises to look very fine. The exhibitors are hard at work fitting it up. The ladies' display will be a centre of attraction. The carriage shed is crowded with entries. The cheese house is also well filled, with many entries yet to come in. Everything points to a most successful exhibition

A FULL LIST.

The following are the Assistant Superintendents:

Grain, Roots and Horticultural—John Holder, St. Catharines.

Arts Department.—Thomas Hunter, Toronto.

Ladies' Work Department.—Mrs. Heaslip, Toronto.

Office—A. Welden, London, and Wm. H. White, Charing Cross.

Poultry.—Chas. Grass, Kingston.

Sheep.—Alex. Elliott, Lyndhurst.

Pigs.—James Matthews, London.

The Superintendents and members of the Council are taking matters very calmly. They have to answer multifarious questions, sensible and nonsensical. The Superintendent and Secretary's offices are constantly bombarded.

Prof Brown, of the Guelph Agricultural College will read a paper at the Wednesday evening meeting.

A military band has been secured to play at the inaugural of the Exhibition. The address will be read on the band stand from which also the speeches will be made.

Flag staffs are being erected on all the buildings so that there will be plenty of bunting.

Persons who are entitled to admission (complimentary) will be allowed to pass through a private gate just above the Secretary's office. None are admitted through the turnstiles but those paying 25 cents, or those having an Exhibition ticket

MISCELLANEOUS NOTES.

The gold and silver medals have just arrived from Paris. They are very fine.

The bicycle tournament occurs on Thursday afternoon at the Driving Park. It is near the Exhibition grounds.

Yesterday the grounds were visited by hundreds, but admission was only allowed to those who were required inside.

The steamer Buckly will make a trip to Kingston from Prescott on Tuesday morning, returning again on Thursday evening.

Mr. Acton Burrows, Manitoba Commissioner, accompanies Hon. Mr. Pope to Ottawa, having some departmental business to transact with him.

Hon. Mr. Wood and Hon. Mr. Pardee, and probably Hon. J. H. Pope will make a trip over the Kingston & Pembroke RR. to the present terminus
