D. Sullivan, Malcolm, Ontario, writes: I have been selling Dr. Thomas' Electric Oil for some years, and have no hesitation in saying that it has given better satisfaction than any other medicine I have ever sold. I consider it the only patent medicine that cures more than it is recommended to cure.

The people of this country have spoken. They declare by their patronage of Dr. Thomas' Electric Oil that they believe it to be an article of genuine merit, adapted to the cure of rheumatism, as well as relieves the pains of fracture and dislocations, external injuries, corns, bunions, piles and other maladies.

Among the most obstinate of chronic diseases to cure is salt rheum. Mr. Isaac Brown of Bothwell, was troubled with salt rheum for years, and says that one bottle of Burdock Blood Bitters has done him more good than $500 paid for other medical treatment.

If you are desirous to obtain immediate relief from any kidney trouble, and thus prevent the fatal results that always attend the neglect of these distressing complaints, and who does not? why take Dr. Van Buren's Kidney Cure at once. It is safe, simple and effectual.

The great cause of much misery and ill health is a disordered condition of the kidneys; an effectual combination of diuretics is found in Burdock Blood Bitters that thoroughly renovates the kidneys and other important glandular organs, and strengthens the debilitated system.

In the present month of October Dr. Arnold's Stomach and Constipation Bitters should be taken to purify the blood and fortify the system against the severe attacks of our Canadian winter. It improves the circulation and cures dyspepsia, biliousness and sick headache. In large bottles at 50 cents. Sold by all druggists.

Nocturnal dyspepsia, mild in its character and producing no actual suffering, often occasions persistent restlessness of sleep. The symptoms are mostly dryness of the mouth, occasional burning of the soles of the feet, heat and throbbing in the head, heaviness resulting commonly from a coated condition of the stomach from eating fatty, highly seasoned food, and, in some cases, taking too much wine. By securing complete digestion and assimilation, Warner's Phosphates and Calisaya have proved the most reliable means of curing this form of irritability.

An Honest Opinion

John Taylor, of Toronto, says he has tried every known remedy for rheumatism, and can honestly recommend Hagyard's Yellow Oil as the best of all; he has been a sufferer from rheumatic pains for years.

CALABOGIE MINES.

Some of the Richest Ore Beds in Eastern Ontario—Accessible by the Opening up of the K. & P. RR.

(Perth Courier.)

A gentleman who has visited these mines says that perhaps one of the most extensive and richest ore bed in Eastern Ontario is that of the Calabogie Iron Mines now being opened up in the township of Bagot, County of Renfrew. These are owned and operated by the Calabogie Mining Company. The mines are well worth a visit to any who can afford the necessary time of driving to Calabogie Lake, about 42 miles from Perth.

The mines are situated in as beautiful a spot as one could desire. A lovely bay, a perfect horse shoe in shape, about three quarters of a mile deep, ornaments the south side of Calabogie Lake, nearly a mile from its foot. The opposite shore, with Mount St. Patrick in the distance, is romantic rough, and at this season of the year, when the leaves are being so charmingly painted by autumn's frosts, is one mass of beauty. The property of the company commences with the eastern bank of this bay and extends eastward about two miles. At the lower junction of the bay and lake is a high promontory through which the Kingston & Pembroke Railway are at present making their road bed. They are utilizing the material taken from this 45 feet cut for filling purposes, in constructing the road across the mouth of the bay. About 200 yards from this point, and within a stone's throw of the bay the Company are busy fitting up as fine a lot of machinery as has ever been used in this country. The boiler and engine are now in place and the steam pump has been working for some days. The two large drums, with their skips and cables, are ready to haul out the ore from the newly opened mine. Between 200 and 300 tons of ore have been mined in preparation for sinking the shaft. The quantity of ore here is marvellous. The vein now being worked is the bottom one of a number uncovered right in the face of a high ridge of rock. It lies against a bed of lime rock called the foot wall, under which miners never look. At the surface this vein shows a thickness of say three feet. It descends at an angle of about 25 degrees, increasing as we go down. At a depth of ten feet the veins is fully seven feet thick. Running parallel with it are other veins of varying thickness separated by thin layers of granite until the top or hanging wall is reached. It is expected that these will ultimately unite in one great seam of solid ore, as they all widen in their descent.

These veins run eastward over the property of the Company for two miles, so one can have no idea of the vast wealth of this ore bed. In many places the veins are struck upon the surface without any digging whatever, so that rich ore is turned up with the first hour's labor. The quantity of ore is practically unlimited, is very easy of access, and easily wrought. The K. & P. Railway Company are building a branch line to the mouth of the mine now opened, so that the ore can be hauled up by the skips and dumped right into the cars without further handling. The K. & P. undertake to have their road in running order from the mine to the point of shipment by June 1st, 1883, and further agree to lay branch lines to each mine as it is opened. The quality of the ore is singularly rich, yielding under assay in two cases 66 per cent., and in one 68 per cent. of pure iron.

The Company are fortunate in procuring the services of Captain Johnson as Superintendent. His forty years' mining experience—a great part received in some of the most extensive mines in the United States—peculiarly fits him for his work; and what he has already accomplished in the Calabogie mines shows him to be master of the situation. He declares the quality of the ore to be as fine as he ever saw, and he has unlimited faith that the future will prove the mine to be a regular "bonanza."

Never Allow It.

Never allow the bowels to remain in a torpid condition, as it leads to serious results, and all health is sure to follow. Burdock Blood Bitters is the most perfect regulator of the bowels, and the best blood purifier known.

Mr. R. C. Winlow, Toronto, writes: Northrop & Lyman's Vegetable Discovery is a valuable medicine to all who are troubled with indigestion. I tried a bottle of it after suffering for some ten years, and the results are certainly beyond my expectations. It assists digestion wonderfully. I digest my food with no apparent effort, and am now entirely free from that sensation which every dyspeptic well knows, of unpleasant fulness after each meal."

Mr. Abraham Gibbs, Vaughan, writes "I have been troubled with asthma since I was ten years of age, and have taken hundreds of bottles of different kinds of medicine, with no relief. I saw the advertisement of Northrop & Lyman's Emulsion of Cod Liver Oil with lime and soda, and determined to try it. I have taken one bottle, and it has given me more relief than any I have ever tried before, and I have great pleasure in recommending it to those similarly afflicted."

Thousands bear witness to the positive curative powers of the German Invigorator, the only remedy that has proved itself a specific for general debility, seminal weakness, impotency, etc., and all diseases that arise from self abuse or overtaxed brain finally ending in consumption insanity and a premature grave. Sold by all druggists, or will be sent free on receipt of $1 per box, or six boxes for $5. Address F. J. Cheney, Toledo Ohio, sole agent for the United States. Send for circular and testimonials of genuine cures.

Hancock's Inspirator

IS THE MOST ECONOMICAL APPLIANCE KNOWN for feeding boilers, pumping purposes on account of the great transmission of heat and the small expenditure of steam required for working it. It is intended to take the place of Pumps and Injectors and may be used instead to great advantage. It differs materially both in its

Construction & Working Qualities

from the class of boiler feeders known as Injectors—inasmuch as it has one set of tubes for lifting and another set of tubes for forcing water—a combination entirely new, reliable and efficient. They are simple to operate, always ready for use and altogether a very reliable feed for boilers.

PAMPHLETS OF INSTRUCTION furnished on application, also testimonials if required. We guarantee every Inspirator according to recommendation or no coarge.
