DIGITAL AUDIO PROCESSING

Digital technology is used everywhere. It enables communication satellites to link people and computer systems all over the world in products such as telephones, compact disc players and personal computers. Digital technology has become part of our daily lives. Now, digital technology transforms the way we communicate on a more personal level.

Researchers have spent years looking for a way to put the superior acoustic quality of digital sound processing into something as small as a hearing instrument. Finally the breakthrough, digital audio processing designed to fit into a small, comfortable and attractive hearing instrument. Using the same digital technology that brought superior sound quality to CD players, sound reproduction is clear, distinct and provides a rich and full sound picture. Soft sounds are amplified so they become audible, and loud sounds are kept from becoming uncomfortably loud.

Communication forms, maintains and enhances relationships between people. Good communication is a vital ingredient to an enriched life. Now digital technology offers a whole new range of possibilities for people with a hearing difficulty.

TRENTON
DENTURIST**

ABOUT OUR CLINIC:

Since 1982, our office has been a trusted name in providing quality and integrity in the field of denture construction.

You will always receive that extra personal attention and commitment to your satisfaction.

With this individual attention, fewer dentures will end up in the bottom drawer. For many years, we have been licensed to serve you DIRECTLY. We are the only profession that spends 100% of our day specializing in the fabrication of dentures. We make new dentures, relines, repair, clean and adjust existing dentures, as well as counsel denture patients about various denture problems. We make everything from start to finish in our own lab that is located right on the premises. There is no "middle man" that can boost costs. We work directly with the patient, and every stage of denture construction is explained. Special attention is given to that type of teeth used, as well as the specific colour and shape that's right for you. The result is a custom cosmetic denture.

FREE CONSULTATIONS

Our office does not charge for consultation. If your dentures are loose, bothersome, damaged, or if you just want a check-up, don't hesitate to call our office for a free, no obligation consultation. We would be happy to discuss any concerns or questions you may have regarding your dentures.

You do not need a referral; simply call our office direct.

Creating confident smiles since 1982.

Get back in the Game!

*Gord Stellick lost 43 pounds
and continues to keep it off*

"The first part of any Herbal Magic program is losing the weight, which I did by losing 43 pounds in a period of four months! The next key component is keeping it off. Eight months after I lost the weight I'm still maintaining my weight. It has been a very happy one year anniversary indeed. The positive influence from Herbal Magic continues even after you hit your goal weight!!"
