

Top countertop trends to spice up your kitchen

Fresh countertops are an easy way to transform any space, including your kitchen, laundry room or bar. When shopping for new surfaces, it's important to select an option that suits your style and budget. Here is a helpful guide to today's hottest countertop trends from Natalia David, trend and design manager at The Home Depot Canada.

Industrial looks

Choose a countertop that mimics steel or concrete to achieve an industrial aesthetic that combines elements of new and worn. With a range of grey tones, industrial styles are versatile and pair well with most finishes. Consider a quartz surface such as Silestone for an on-trend, one-of-a-kind look.

Large-scale veining

Add some drama to your countertops with large-scale veining. This feature comes in a variety of colours and finishes, including timeless white with grey veining and ultra-modern black with white and grey accents. Consider pairing with hardware that plays off the colour of the veining or continue the material down the sides of your island for a dramatic waterfall look.

Warm tones

Making a comeback in popularity, warm colours are an excellent choice for shoppers with traditional tastes. These options pair well with light and pale-toned flooring and complement most hardware options.

Wood

Natural countertops add warmth and character to any room. They're easy to maintain with regular maintenance, and one of the most budget-friendly options

available. Wooden countertops are best suited to contemporary design styles and come in a range of stains and finishes.
