CUSTOM TV TOPICS

THE OLD AND NEW

BILL POLKEY

It's surprising that there still is a large number of people who think about TV in the same category as radio. Actually, the difference might be compared with the T-model Ford and modern V-8 engines. The number of tubes, components, wire connections, etc., in a TV set makes a radio seem like a toy.

Hi-fi and stereo electronics is even more complicated in comparison to the old record player.

CUSTOM TV does the servicing of many of these sound appliances right in the living room of your home with fast and modern servicing instruments. Next time phone **EV 5-3757**, and we would like to point out some of the interesting features of your set.
