

Treat Your Boat to a ... **SAGEN JUMBO Boat Hoist!**

The Sagen Jumbo Outboard Boat Hoist is designed for today's longer, wider and heavier outboards and motors.

Not only does the Jumbo handle these larger boats easily, but a four point keel support is available to prevent sagging and distortion of boats.

Also, Vertical Guide Bars can be furnished and are adjustable for various boat widths. In addition to holding the boat sideways, they help to hold it in fore and aft position.
