### Is Your Kitchen Plumbing Modern?

While it is commendable to give the utmost attention to the construction of your bathroom, it is advisable to give as equally good attention to the sanitary equipment of your kitchen.

Take into consideration the fact that all your food is prepared in the kitchen and that the utensils in which it is prepared depend upon the sanitary equipment of the kitchen for their cleanliness.

Is this fact alone not sufficient to warrant the installation of a thoroughly sanitary kitchen sink?

We would like to examine the plumbing in your kitchen and if it is defective, tell you the cost of putting in a "Standard" Porcelain Enameled Sink with an abundant supply of hot and cold running water. This done, cleanliness will be assured.

Our booklet, "Modern Home Plumbing," shows several kitchens equipped with "Standard" Sinks. Call, write or phone for a copy. Every "Standard" Sink is fully guaranteed.
