

A GOOD WAX PRESS.

Some Comments and Suggestions on This Method of Rendering Wax.

To use a wash-boiler to melt wax in is sure to raise trouble between a man and his housekeeper; for a woman who attempts to wash, using a boiler that has previously been used for wax melting, is sure to lose her temper if not her religion, for it is no easy job to clean one after being once coated with wax and slumgum; and why use a boiler at all when a square box of galvanized iron is just as cheap, much better, and can be

The Outdoor Furnace for Melting Combs.

used on a brick furnace outdoors to good advantage, while a boiler could not? About 30 bricks and two joints of stovepipe will make the furnace; and when not in use all can be packed away in some shed out of sight. Not over half an hour is time enough to make it complete; and any one with a town lot has room enough, and there is no musing of floors to vex the good woman; and the square tank has advantages over the round one of being easier to skim—that is, if you use a square dipper, as you ought to. If you ever used a square one you could readily see the advantage of it. A five-cent cake-tin is better than a round dipper.

I have two square tanks—one 18x15 inches, and 15 inches deep; the other 18 inches in dimensions, writes C. A. Hatch, in Bee Culture. A 15-inch one made of heavy galvanized iron would last a lifetime if cared for. A dipper should be about 6x4x4 inches deep, and have a flat handle, rather short, and bent to a hook, so as to hang on the edge of the tank inside when not in use.

Another mistake that is often made is putting too much comb in the boiler at once. Just enough for one pressing at a time is enough, and when you are pressing it out your helper puts in another batch, fires up, and attends to the melted wax; or, if you are working alone, it will do no harm to let the press stand while you fill up for the next pressing.

Dipping the follower and rim into the boiler is just as well as to pour that painful of water into the press, and much less bother.

I usually put in about four gallons of water and slumgum at each pressing; but this means an indefinite quantity, for I may get more water than you do. Plenty of hot water is my motto, for beeswax seems to like to run out with water when it will hardly move with pressure. I use an old square five gallon can to catch the wax in. When the wax is deep enough to warrant it, I skim it off (with a square dipper mind you) into small tins to cool. These are kept covered as much as possible. With this method the water can be returned to the boiler before it gets much cooled, and the wax is ready for market with a little scraping at the bottom; and even this can be largely avoided by extra care in skimming when putting into the cooling tins. The wax may need to be washed, as the water in the boiler gets rather "rich" in coloring before many hours run.

There is one point that should be impressed on all bee-keepers—i. e., that all heating and boiling of wax after being once melted is to its detriment; also that iron rust turns wax black.

CHICKEN FEED.

See that the little chicks, as well as the older ones, have plenty of water, and renew it often.

Have the shelter places about in the chicken grounds where the chicks can run to shelter from showers and from birds of prey.

Ducklings are easier raised by hand than by hen. If hatched in April or May, they require no heat, but should be placed in a box at night and taken indoors while very young.

Put a little tobacco dust and ashes in the nests. This is the time when lice and mites begin to multiply rapidly, and a good insecticide will go a long way towards destroying them.

The hen is truly a profit payer. She is capable of producing from 150 to 200 eggs in a year. If these eggs were hatched and the chicks sold at the age of six months, they would yield a return of no less than \$60.

Raises Ducks.

To illustrate how heavy a loss one could endure without failure, Weber, the duck man, says that if only one-half of the eggs put in the incubator hatched and only one-half of those hatched lived, there would still be enough in it to encourage one to stick to the business, without taking into account the fertilizing value of the vanquished host.

CARE OF YOUNG CHICKS.

Important Features in the Successful Raising of Poultry.

There are many simple methods of rearing young chicks naturally without much expense. An ordinary store box, about three feet long by two feet high, turned over on its side, makes an ideal nest or coop, providing some strips are added to the top to keep the water out and one board added as a sort of shed for the front, so that beating rains cannot blow in. Add to this front, an ordinary screen, such as you can buy at any hardware store, put it on a frame, the same size as the front of your box, and by fastening your chickens in at night you have a safe place from vermin of every kind, and by cleaning the box often, seeing that the mother hen is free from vermin, you will start your chicks in the direction of the blue ribbon.

Wholesome food, properly mixed, will very materially assist you in this direction, says Poultry Journal. There are so many good feeds advertised at the present time that we believe it is cheaper, all things considered, to buy the feed than to attempt to mix it yourself. In case you are so situated that you cannot secure this feed without trouble, we would suggest a diet of fine cracked corn, millet seed, cracked wheat and cracked kafir corn. These cereals properly mixed make an elegant food for young chicks and they do well on it.

If you have no feed that contains grit, then it will be necessary to add either grit, pounded glass or crockery, either of which is excellent. Old broken lamp chimneys, flower pots or any kind of dishes that have been broken around the kitchen are ideal poultry grit and it is an easy job to demolish it by taking a flat stone and hammer and crush it up. Some would think that ground glass would be injurious to chicks, but we have never found it so, in fact the sharper the edges the better they seem to get along with it as it lodges in the gizzard and a mill of itself to grind the feed, then allowing it to enter into the stomach.

Where hens are confined in boxes of this kind while the weather is uncertain it is well to make a small slide partition so that the chicks can go out, but still retain the hen. They will run away for a few feet, but will come back constantly at the call of the mother and are free from cats or other vermin. They will find their way in at roosting time, as well as when sudden storms come up.

When chicks are reared artificially, no more than 10 should be given to any brooder, regardless of size, if you expect them to mature and develop into prize winners. The greatest economy is in having sufficient number of brooders to properly raise your chicks to maturity, and it is not practical to change them from one location to another after they have become accustomed to one place of roosting. The best results we have ever obtained were where chicks were started and grown to roosting size without changing them from the brooder or the position of the run, in fact the only way to make chickens grow is to keep them absolutely contented. The contented person is almost invariably fat and healthy, while the one who frets and is dissatisfied is just the reverse, and the same rule will apply to all branches of live stock. Any animal that is well cared for and is contented in its home will do well and give the very best results.

Breeders will often notice one or two females in a pen of mated birds that are constantly trying to get out. These birds will never give a good report of themselves and the sooner they are moved to some other quarters the better, and the same rule applies to young chicks. If they are satisfied with their quarters you can almost see them grow, while if cramped, crowded and filthy, you will meet with disappointment.

VIGOR OF FOWLS.

Can Be Judged Accurately During the Molting Period.

Prof. G. C. Watson, relative to the vigor of fowls, says: There is, perhaps, no time in the history of the fowl that will indicate its vigor so well as the molting period. Fowls that molt in a very short time and hardly stop laying during this period as a rule have strong, vigorous constitutions and it properly fed give a large yearly record. On the other hand those that are a long time molting have not the vigor and strength to digest and assimilate food enough to produce the requisite number of eggs. If it is necessary to select fowls at some time during the year other than the molting period, some indication of their egg-producing power is shown in their general conformation. In selecting a hen for egg production, her form will give some indication of value. A long, deep-bodied fowl is to be chosen rather than one with a short body, whose under line is not unlike a half circle. A strong, healthy, vigorous fowl usually has a long body, a deep chest, with a long and quite straight underline. Other things being equal, the larger bodied fowls of the egg breeds are to be preferred. It is a rule that fowls bred for egg production are larger bodied than those bred for fancy points. Whenever vigor and constitution form an important part in the selection of fowls for breeding, the size of the fowls is invariably increased.

There are signs of the return of the chaperon. The younger generation has tried jumping into the social swim all alone—without the comfort of the rope—and she has sometimes found herself in deep water and difficulties. But the chaperon of old is no longer—old.

We have developed the married woman who has attained the art of preserving youth. She is no longer the dragon with fearsome side curls and truculent view of any insistent young man. She is simply the companion on the shore who holds a rope attached to the novice who is in for her first swim!

The new chaperon pays out the rope pretty freely, and is generally looking the other way. But there she is on the bank. She is a married woman, the girl can appeal, just as a man gives the address of his banker when questions are asked as to ability to pay rent. Rope, lifebelt—such is the chaperon.

Never Had. Miss Flurry—Have I ever given you reason to suppose, Mr. Samlipyte, that I cared for you otherwise than as a friend?

Mr. Samlipyte—You have not, Miss Flurry. I ought to have had sense enough to know that when you accepted kisses and presents from me you didn't mean anything by it.

Taken Literally. "Lady," said Weary White, "I'm near dead for a good square meal."

"Well," said Mrs. Hauskeep, "if you'll saw some of that wood over there I'll let you eat your fill."

"Good day, lady! I ain't never at no wood, thank ye, kindly."

A drinking dish protector in the poultry yard is the next best thing to a drinking fountain for keeping water clean, says Orange Judd Farmer. The dish should be of crockery so as to be lasting. The protector illustrated herewith is made of two one-foot squares of board. One is sawed across diagonally and the other nailed to the two triangular pieces thus formed.

WHERE THE NUDE IS NATURAL.

Hopi Indians Have Little Use for Clothing in Their Villages.

When living by themselves under perfectly natural conditions, as I found them 25 years ago, nearly all the Hopi children ran about entirely nude, and the adults were so unconscious of the need of clothing or of the lack of it as were Adam and Eve prior to the apple episode. The presence and teachings of the white man have of late years induced a certain measure of self-consciousness, so that all except the very little children are chary of allowing themselves to be seen unclothed by strange eyes, but I lived so long among them and gained their confidence to such an extent that I was able to photograph them as if from the viewpoint of one of themselves and so to gain a record, which to anthropologists should prove very interesting, of the fact that these people are physically at an earlier stage of development than the white race, says a writer in the Craftsman.

Although, if you have lived long enough among the Hopi for them to feel thoroughly acquainted and at home with you, they may sometimes go around without clothing as comfortably and unconsciously as with it—you feel no sense of shock as at the sight of nakedness, for your experience is precisely like that recorded by the explorers and travelers in Africa and among all dark-skinned races—it is not the lack of clothing but the sight of the white skin that is startling. A brown skin seems in a way to be a sort of clothing like the fur of an animal and excites no more attention, after once you are used to seeing it undraped. You note only the extreme beauty of color, form and movement, and after awhile begin to realize something of the innocence, freedom and childlike joy of living that we like to think prevailed among all men in the morning of the world.

As babies and little children are so seldom troubled with garments of any description, they are early inured to all changes of temperature and remain unaffected by chill winds, soaking rain and the scorching desert sun. Also, they have the same freedom in the use of every muscle as little animals, and they can climb almost anywhere and balance themselves in most precarious positions with no more danger than as if they were panther kittens.

Insanity. It has commonly been said that lunacy was increasing in the modern world. But Mr. Noel Humphreys in his paper read before the Statistical society proclaims the theory that lunacy is not increasing at all. According to his ingenious statement the apparent increase is due not to the growth of lunacy, but to the growth of the care of lunacy. To put the matter shortly, he holds that it is not so much that there are more madmen, but that there are more mad doctors.

Substantially, his case appears very sound. There can be little doubt that many men are now put in asylums who would in previous ages have been allowed to wander in the meadows or to play about the streets. There can be little doubt that many men are now called insane who in other times would merely have been called wicked; and it is possible that many are now called madmen who in other times would merely have been called saints.

The only question is whether this scientific harvest of all the lunatics alive is so great an improvement as it looks. There can be no doubt that the wise men have come from all the ends of the earth to capture the village idiot, who once danced without having bricks thrown at him.

Preparing for It. Prof. M. I. Pupin, the famous electrical expert, told at the dedicatory banquet of the new woman's club the Colony, in New York, an appropriate story.

"The excellence of this repast," he said, "brings to my mind a story about a man whose repasts were by no means excellent.

"This man lived in my native town of Idvor, and he was noted for his parsimony. Let us call him Mr. Smith.

"There was an old major in Idvor who said to his valet one evening: 'Go and tell the cook to get me ready a chop and a poached egg.'

"Pardon me, major," said the valet, "but have you forgotten that you are dining with Mr. Smith to-night?"

"The major frowned.

"Yes," he said, "I had forgotten it. Tell the cook to make it two chops and two poached eggs."

The Modern Chaperon. There are signs of the return of the chaperon. The younger generation has tried jumping into the social swim all alone—without the comfort of the rope—and she has sometimes found herself in deep water and difficulties. But the chaperon of old is no longer—old.

We have developed the married woman who has attained the art of preserving youth. She is no longer the dragon with fearsome side curls and truculent view of any insistent young man. She is simply the companion on the shore who holds a rope attached to the novice who is in for her first swim!

The new chaperon pays out the rope pretty freely, and is generally looking the other way. But there she is on the bank. She is a married woman, the girl can appeal, just as a man gives the address of his banker when questions are asked as to ability to pay rent. Rope, lifebelt—such is the chaperon.

Never Had. Miss Flurry—Have I ever given you reason to suppose, Mr. Samlipyte, that I cared for you otherwise than as a friend?

Mr. Samlipyte—You have not, Miss Flurry. I ought to have had sense enough to know that when you accepted kisses and presents from me you didn't mean anything by it.

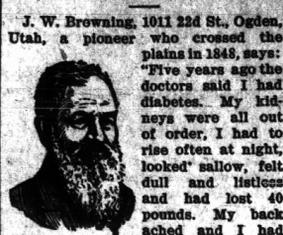

Taken Literally. "Lady," said Weary White, "I'm near dead for a good square meal."

"Well," said Mrs. Hauskeep, "if you'll saw some of that wood over there I'll let you eat your fill."

"Good day, lady! I ain't never at no wood, thank ye, kindly."

A WONDERFUL GAIN.

A Utah Pioneer Tells a Remarkable Story.

J. W. Browning, 1011 22d St., Ogden, Utah, a pioneer who crossed the plains in 1848, says: "Five years ago the doctors said I had diabetes. My kidneys were all out of order, I had to rise often at night, looked 'sallow,' felt dull and listless and had lost 40 pounds. My back ached and I had spells of rheumatism and dizziness. Doan's Kidney Pills relieved me of these troubles and have kept me well for a year past. Though 75 years old, I am in good health."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

ALMOST FELT ENVY PANGS.

Great Cricketer's Simple Tribute to His Own Worth.

In 1885 there was a great celebration in London in honor of Dr. Samuel Johnson, and among those in attendance was the Australian "crack" cricketer, Bonner, then at the height of his fame.

As one of the guests, says the compiler of the recently published "Letters" of the late Dr. George Birkbeck Hill, Bonner's health was proposed. His response was noteworthy.

"After seeing the way in which Dr. Johnson's memory is revered," he said, with great simplicity, "I am not sure that I would not rather have been such a man than have gained my own greatest triumphs in cricket."—Youth's Companion.

SORES AS BIG AS PENNIES.

Whole Head and Neck Covered—Hair All Came Out—Cured in Three Weeks by Cuticura.

"After having the measles my whole head and neck were covered with scaly sores about as large as a penny. They were just as thick as they could be. My hair all came out. I let the trouble run along, taking the doctor's blood remedies and rubbing on salve, but it did not seem to get any better. It stayed that way for about six months; then I got a set of the Cuticura Remedies, and in about a week I noticed a big difference, and in three weeks it was well entirely and I have not had the trouble any more, and as this was seven years ago, I consider myself cured. Mrs. Henry Porter, Albion, Neb., Aug. 25, 1906."

Hard to Realize. "Mother," said a college student who had brought his chum home for the holidays, "permit me to present my friend, Mr. Specknooodle."

His mother, who was a little hard of hearing, placed her hand to her ear.

"I'm sorry, George, but I didn't quite catch your friend's name. You'll have to speak a little louder, I'm afraid."

"I say, mother," shouted George, "I want to present Mr. Specknooodle."

"I'm sorry, George, but Mr. — What was the name again?"

"Mr. Specknooodle!" George fairly yelled.

The old lady shook her head sadly. "I'm sorry, George, but I'm afraid it's no use. It sounds just like Specknooodle to me."—Everybody's Magazine.

Bill Nye's Long Wait. Bill Nye when a young man once made an engagement with a lady friend of his to take her driving on a Sunday afternoon. The appointed day came, but at the livery stable all the horses were taken out save one, a shabby, exceedingly bony horse.

Mr. Nye hired the nag and drove to his friend's residence. The lady let him wait nearly an hour before she was ready, and then on viewing the disreputable outfit flatly refused to accompany Mr. Nye.

"Why," she exclaimed, sneeringly, "that horse may die of age any moment."

"Madame," Mr. Nye replied, "when I arrived that horse was a prancing young steed."—Harper's Weekly.

Plety. In a recent number of a German magazine a writer offers a variant of the tale lately published in a book of children's true sayings, which relates how two small girls tried to sit on one stool, and one of them remarked: "If one of us was to get off the stool, there would be more room for me."

The Teutonic version tells how a German sat by the bedside of his dying wife and murmured piously: "If it pleases the good God to take one of us, I shall go to Berlin."

CHILDREN SHOWED IT Effect of Their Warm Drink in the Morning.

"A year ago I was a wreck from coffee drinking and was on the point of giving up my position in the school room because of nervousness.

"I was telling a friend about it and she said, 'We drink nothing at meal time but Postum Food Coffee, and it is such a comfort to have something we can enjoy drinking with the children.'

"I was astonished that she would allow the children to drink any kind of coffee, but she said Postum was the most healthful drink in the world for children as well as for older ones, and that the condition of both the children and adults showed that to be a fact.

"My first trial was a failure. The cook boiled it four or five minutes and it tasted so flat that I was in despair but determined to give it one more trial. This time we followed the directions and boiled it fifteen minutes after the boiling began. It was a decided success and I was completely won by its rich delicious flavor. In a short time I noticed a decided improvement in my condition and kept growing better and better month after month, until now I am perfectly healthy, and do my work in the school room with ease and pleasure. I would not return to the nerve-destroying regular coffee for any money."

"There's a Reason." Read the famous little "Health Classic," "The Road to Wellville," in pkgs.

SPECIAL TRAINS.

National Editorial Association and Christian Endeavor Conventions.

Personally conducted special trains via the Chicago, Union Pacific & North-Western Line leave early in July for the Pacific Coast. Special all-expense tours at very low rates for round trip, including sleeping car accommodations, meals, etc. All the advantages of a delightful and carefully arranged tour in congenial company. Write for itineraries and full particulars. S. A. Hutchinson, Manager Tourist Department, 212 Clark Street, Chicago.

A Capable Woman. "There is no place filled by man," remarked Mrs. Strongmild, "that woman cannot fill."

"It wouldn't be so bad," rejoined her husband, "if she would only let it go at that. I saw one to-day who was filling two men's places."

"Where?" queried Mrs. S. "In a street car," answered the wretch as he made a hurried exit from the room.

Laundry work at home would be much more satisfactory if the right Starch were used. In order to get the desired stiffness, it is usually necessary to use so much starch that the beauty and fineness of the fabric is hidden behind a paste of varying thickness, which not only destroys the appearance, but also affects the wearing quality of the goods. This trouble can be entirely overcome by using Defiance Starch, as it can be applied much more thinly because of its greater strength than other makes.

Stolen Naps. "How do you like that office boy I sent around?" asked the banker.

"Don't think much of him," replied the broker. "He isn't wide awake."

"But you told me the last office boy you engaged was too forward and you wanted one who was retiring."

"Yes, but this one is too retiring. Every time I slip out for a few hours I find that he retires on top of the big safe and snores until I return."

Identified. "Your man," said the promoter of a feast, "is a has been."

"And yours," retorted the whipper-in for the rival show, "is a never was."

Thus, by a chance bit of repartee, was the identity of the stellar attractions made clear enough.

Catarrh Cannot Be Cured with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonic known, combined with the best blood purifier, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces the wonderful results in curing catarrh. Send for testimonials, prepared by Dr. J. C. HENRY & CO., Proprietors, Toledo, O. Sold by Druggists.

Outspoken Criticism. Somewhat outspoken is the Penang Gazette. It remarked recently: "Never has there been in the world's history such a flabby, herring-fatted parody of an administration as that which is feebly trying to control the destiny of the British empire to-day."

With a smooth iron and Defiance Starch, you can launder your shirt-waist just as well at home as the steam laundry can; it will have the proper stiffness and finish, there will be less wear and tear of the goods, and it will be a positive pleasure to use a Starch that does not stick to the iron.

Miss Passay—Many young girls nowadays are positively awful. The idea of one being engaged to two young men at the same time. It's simply shameful!

Miss Pert (maliciously)—And it's aggravating, too, isn't it?

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Chas. H. Peck*.

In Use For Over 30 Years. The Kind You Have Always Bought.

Out of the Question. Mrs. Knicker—"Do you forswear meat during Lent?" Mrs. Bocker—"Gracious, no; James has to have good dinners or I wouldn't get the money for my Easter clothes."

Give Defiance Starch a fair trial—try it for both hot and cold starching, and if you don't think you do better work, in less time and at smaller cost, return it and your grocer will give you back your money.

It is motive alone that gives character to the actions of men, and pure motive is in the deed not in the event. Be not one whose eye regardeth reward.—Kreeshna.

Shake into Your Shoes Allen's Foot-Ease. It cures painful, swollen, smarting, sweating feet. Makes new shoes easy. Sold by all Druggists and Shoe Stores. Don't accept any substitute. Sample FREE. Address A. S. Olmsted, Le Roy, N. Y.

English Imports of Grain. It would take 10,000,000 acres to produce the amount of grain which England yearly imports from abroad.

The greatest cause of worry on ironing day can be removed by using Defiance Starch, which will not stick to the iron. Sold everywhere, 16 oz. for 10c.

Many a man who is on the road to fortune doesn't know where to get off.

Don't Sneeze Your Head Off. Krause's Cold Capsules will cure you almost instantly. At all Druggists, 25c.

Meet men think they know a lot more than they really do.

Lawyer's Single Binder cigar—richest, most satisfying smoke on the market. Your dealer or Lewis' Factory, Peoria, Ill.

Pawnbrokers are able to see the silver lining of your clothing.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Build your hopes high—then stand from under.

MOTHERHOOD
The first requisite of a good mother is good health, and the experience of maternity should not be approached without careful physical preparation. As a woman who is in good physical condition transmits to her children the blessings of a good constitution.
Preparation for healthy maternity is accomplished by Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, more successfully than by any other medicine because it gives tone and strength to the entire feminine organism, curing displacements, ulceration and inflammation, and the result is less suffering and more children healthy at birth. For more than thirty years
Lydia E. Pinkham's Vegetable Compound
has been the standby of American mothers in preparing for childbirth. Note what Mrs. James Chester of 437 W. 35th St., New York says in this letter:—Dear Mrs. Pinkham:—I wish every expectant mother knew about your great value at this trying period of a woman's life urged me to try it and I did so, and I cannot say enough in praise of the good it did me. I recovered quickly and am in the best of health now."
Lydia E. Pinkham's Vegetable Compound is certainly a successful remedy for the peculiar weaknesses and ailments of women.
It has cured almost every form of Female Complaints, Dragging Sensations, Weak Back, Falling and Displacements, Inflammation, Ulcerations and Organic Diseases of Women and is invaluable in preparing for Childbirth and during the Change of Life.
Mrs. Pinkham's Standing Invitation to Women
Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

NEW WHEAT LANDS IN THE CANADIAN WEST
5,000 additional miles of railway this year have opened up largely increased territory to the progressive farmers of Western Canada and the Government of the Dominion has continued to give ONE HUNDRED AND SIXTY ACRES FREE to every settler.
THE COUNTRY HAS NO SUPERIOR
Coal, wood and water in abundance; churches and schools convenient; markets easy of access; taxes low; climate the best in the northern temperate zone. Law and order prevail everywhere.
For advice and information address the SUPERINTENDENT OF IMMIGRATION, Ottawa, Canada, or any authorized Canadian Government Agent.
C. J. BROUGHTON, Room 430 Quincy Bldg., Chicago, Ill.; W. H. ROGERS, 3rd St., S. E., Traction Terminal Bldg., Indianapolis, Ind.; or T. O. CURRIE, Room 12 B, Colburn Bldg., Milwaukee, Wis.

DODD'S KIDNEY PILLS
CURES RHEUMATISM, BRUISES, BURNS, DIABETES, GRAVEL, NEURALGIA, MIGRAINE, AND ALL AFFECTIONS OF THE URINARY TRACT.
Lewie's Single Binder straight 5c cigar is good quality all the time. Your dealer or Lewis' Factory, Peoria, Ill.
A single day grants what a whole year denies.—Italian.

FREE
To obtain any amount of **PAXTINE** send her absolutely free a large trial box of Paxtine with book of directions and genuine testimonials. Give your name and address on a postal card.
PAXTINE cures rheumatism, neuralgia, sciatica, lumbago, migraines, etc. It is a powerful purifier of the blood, and gives immediate relief. Thousands of women are using and recommending it every day. 50 cents per box. Write for free trial box. IT COSTS YOU NOTHING TO TRY. THE E. FAYTON CO., Boston, Mass.
