

Data Management:

This CSS template should require very few modifications to the VITA Data Management side.

Branding:

Any banner you upload is being called within the CSS, so you will need to make sure the background-image URL in ".PageHeader" is correct. The header box on the Branding page should simply say:

```
<div class="PageHeader"></div>
```

You may want to ensure that your text (the name of your library or collections) is in the middle 1000 pixels of the banner so that it will not be cropped out on smaller screens.

Search page:

The sidebar you choose for links should contain code laid out in the following way:

```
<div class="SiteNav">
<div class="h4">Navigate</div>
<a href="http://www.knowledgeontario.ca/altStyleThree/WhatsNew">What's
New</a>
<a href="http://www.knowledgeontario.ca/altStyleThree/
