

Everything from shoestyle to hairstyle

By LIZ CAMPBELL
Special to the Beaver

"I never dreamed we would experience the growth we have," says Lynn Hutton with wonder. "But we have to keep working hard to keep the quality there. We are not a factory."

Keeping the quality at Hutton's, the only total grooming spa in the Toronto area, means being handled by a completely professional staff, trained and qualified in their disciplines; it means little special touches like a cup of tea or coffee in a china cup; it means an invigorating head massage when you have a shampoo. Most of all, it means going the extra mile with customers, taking the time to ensure they are completely satisfied.

With four floors of services and products to choose from, one would require a book to list them all.

"You could sum us up by saying we do everything from shoestyle to hairstyle," says

Hutton. But even this doesn't tell the whole story.

The basement houses a qualified masseur as well as a comfortable room in which Hutton's offers executive grooming and colors and style consultations.

Both men and women, over 40,000 of them thus far, have benefited from individual counselling on color, style, and wardrobe planning. There are even courses on social and corporate etiquette.

The main floor is home to make-up specialists. Here too, you

can consult with Anna Gonzales, a specialist in therapeutic make-up to minimize scars, port wine stains, and other flaws. In addition, award-winning designer, Linda Lundstrom, has a fashion showroom here.

On the busy second floor, designers in the hair salon confer with clients about everything from color treatment and perms to a chic haircut. Here, every care has been taken for the ease of the client. Even the European import sinks allow the hair to be shampooed and scalp massaged without the usual neck stretch required by conventional beauty salon basins.

The top floor plays host to the spa. Waxing, manicures, pedicures, facials, body treatments, and more are found here. Stress-relieving aromatherapy baths are immensely popular as are mudbaths which have a cleansing, detoxifying effect on the skin. For dry skin, a sea algae bath moisturizes and stimulates blood flow and, of course, there are saunas and steam baths.

Hutton is constantly in demand to lecture for everyone from
