THE NEW MINISTRY.

Av honest man secures the confi dence and good-will of good and bad alike, while a knave fails to obtain the respect even of his bro-ther knave. What an apt illustrather knave. What an apt illustra-tion of this truth is afforded in the career of the late Macdonald-Sicotte Administration ! portant as have been the changes it has effected, or the measures has carried through, it will mark an era in the political history of the cited to show the ease with which some men disembarasss themselves of their principles when these present any obstacle to their obtaining many that opinions formed in opposition for the purpose of damaging a government in the eyes of the public, do not afford the safest to office, and may cecasionally be exceedingly inconve-

Mr. Wallbridge tolled the knell of the late Ministry when he an-nounced its policy to the House last year. No large share of discernment was necessary to predict that men, who so unblushingly repudiated all their former professions, and acted contrary to the whole tenor of their political career in order to secure a short and uncer-tain lease of power, would speedily meet the disapprobation of the country. So, in-ned On the very House and the deed, it happened first opportunity which presented upon he bases his claims for a re-itself to test the feeling of the House, it was found that even the supporters of the Government were afraid to injure their prospects of had pursued. Their policy has been announced in Tuesday's Globe. Representa-tion by Population will be an open question, and the re-adjustment of the representation has been aban-Now it seems remarkable that such a course should meet with the approval of the Globe. In the stormy times of the Cartier-Macdonaid Administration, it constantly and vehemently urged that no Gowith the representation question was worthy of the support of Upper Canada. Every means was used to defeat members of that Go vernment by agitating the question, and it was asserted that if Upper Canadian members were only true to their principles, Lower Canada would be forced to accede to the justice of our demands. If even an individual member ventured to act as the whole Ministerial party is now doing, he was at once denounced as a traitor to Upper Canada, and every means was used to secure his defeat at the in future, but at the same time, we cannot but think that men who are guilty of such glaring meonsistncy and such manifest hypocrisy, should meet with a merited rebuke from the people. If left at home for the next four years, they would no doubt reflect upon the error of their ways, and become convinced hat fair and honest dealing afford the best recommendation to public

### EAST RIDING OF YORK

Every intelligent elector of this constituency should, now take oc-casion to ask himself the following questions: What has Amos Wright ver done to merit the confidence of the people whom he has represented? Has his course as a lie man been marked by any feature calculated to gain our admi-tation and secure our respect, or the contrary? Has he been the guardian of the interests of the people, or the betrayer of them? Has he endeavored to promote economy and good government, or has h lent his aid to inaugurate those ruinous enterprises and the mis chievous schemes which have burdened the country with such a load of debt? Das he been consistent and independent, or has he vecred with every wind, and been the tool of one set of designing politicians after another t. Mr. Wright is now in the teens of his political career, hazard, we might feel inclined to allow in the teens of his political career, and we seriously think he should be called to give an account of his stewardship, and to show wherenewal of public confidence.

Many of our readers will be dis-

posed to forget the fact, that Mr. Wright was one of the most obsere-election by expressing their approval of the course the Ministry tlinck's Administration—that he we recommend her to go to followed that obnoxious Ministry in all the worst of its measures timate Ministers, even at the very time when the former made a desperate effort to prevent their defeat.

The middle sentence in this para graph is, grammatically, incom-plete, nevertheless, it expresses an important truth, and cannot be misunderstood. In 1857, Markham gave Mr. Wright 235 of a majority, vhile in 1861 it gave him only 78. In 1857, Scarboro gave him a majority of 39, white in 1861 it left him in a minority of 79. This plainly shows his growing unpopularity and we cannot but think that the Riding might be more worthily represented. The time has now come when a change seems to be imperatively demanded, and we

In our issue of the 8th inst., we intimated to our numerous readers that "a course of systematic deception is at present at work at Richmond Hill," an assertion in which we were corroborated by authentic information, which we received from Afton, Chenango Co. ## Prodigious Meeting.

In our last we notified a meeting of the Electors of Vaughan to take into consideration the School Bill with its progress through the Houses, and as we always endeavour to publish anything of local interest and importance, our representative was on the ground in good time to secure a full report of the proceedings from the very beginning. It was our impression that the Electors could not have been convened more opportunely that they would express their opinions freely, candidly, but firmly; that they would do their duty, as the country expected them; review the conduct of their member and if he is to be blamed, censure himif praised, land him. Nothing is more important than to get the opinion of the country, for the times are very critical; and it behoves every man if he is at all anxious to pertrusi a gentleman will be elected who will reflect more credit upon member of society, he is involuntarily invested with, to utter his sentiments without lear, think for How Canadians are Humbugged himself, and reason without prejujudice

Now, in our brief report it will be seen whether the gentlemen present acquitted themselves according to the above idea of their duties; and it must be borne in mind that at this season of the year, time is money to the farmer, and that most of our Electors are farmers; there polls. We are liappy to see that cular, past and present, in regard to the party is coming to its senses now, and that it is likely to pursue of disease that mankind is subject to 1 reckon a half day at least to 1 and what with preparation, time, party and that it is likely to pursue of disease that mankind is subject to 1 reckon a half day at least to 1. making a total of fifty days, or a month and three weeks labour lost to the country. Seeing, then, that an assembly at this season is such a costly thing its results ought to be in proportion; and now here is the statement of what took place, and our readers can judge for them-
