APRIL LIBRARY NEWS

AUTOMATION UPDATE

The task of converting all our catalogue records to machine readable form continues. At this point, all author and title information on the Memorial Library's holdings is stored in the computer, but the subject approach is not yet complete. In other words, by searching the terminal under a specific heading, such as SOCCER, you will probably only retrieve half or two-thirds of what the library actually contains on that subject.

The card catalogue won't meet all your needs either, unfortunately, because materials purchased since late 1981 are not listed in it. To be on the safe side you should check with the librarian who will direct you to the information you are seeking.

The Library's fourth public access terminal (still the first four in this part of the country) has now been installed in the Children's Department. We hope to make additional terminals available during 1983.

Please note that instruction on use of
