

Motor Transportation Aids North Shore Progress

Pacific Stage Lines

FEW communities of our population in Canada possess a more reliable and luxurious motor transportation than the North Shore. Pacific Stage Lines on this side of the inlet is a distinctly North Shore System.

Comfortable safety-coaches operating from the former P.G.E. Railway Station, foot of Lonsdale Avenue, North Vancouver, connect with ferries. They serve every point between Lonsdale Avenue and Horseshoe Bay.

Through trips are also made from Motor Transport Building, Seymour and Dunsmuir Streets, Vancouver, via the Second Narrows' Bridge to Horseshoe Bay.

This efficient transportation system, operating on frequent, rigid schedules is a vital contribution to North Shore prosperity.
