Correspondence

To the Editor,

Dear Sir:—I noted with much interest M.S.S.'s letter in last week's issue advocating that the name of Baby Mountain be changed to something more dignified and in keeping with the natural charm and beauty of our surroundings. This is exactly my own opinion. But perhaps I might suggest that personally I would favor the name of Mount Capilano. This, partly owing to the proximity of the river curling near its base; but chiefly perhaps, for the reason that one of the finest Indian chieftains of our present day lies buried in the first gentle slopes of this young mountain. I refer of course to Chief Joe Capilano—and I consider it entirely fitting that the slope on which he sought his last rest be so called in his honor. Let this mountain gain new prominence. Why should it not take up the name of Capilano too? Let this mountain have a name that means something—a name that at least will speak to future generations of an early day in the history of our country that will live through the ages.

I thank you for your kind attention.

Yours truly,
P. Q.

COUNCIL NOTES

The North Vancouver Board of Trade sent a circular calling attention to the "Buy at Home" campaign being staged in that city. They were advised that West Vancouver supports the principle that residents should buy at home.

LINKED UP WITH THE WELFARE OF YOUR COMMUNITY

ARM in arm, the welfare of Vancouver and B.C. Electric progress go forward. Every step made by the B.C. Electric marks a forward step by your community. Every dollar spent by your public utilities is a dollar furthering the interests of Vancouver.

During the next six years more than \$50,000,000 will be spent by the B.C. Electric in extending all branches of its services. More than \$50,000,000 attesting B.C. Electric faith in the future of your community!

The welfare of your community & your community's public services are linked.

BRITISH COLUMBIA ELECTRIC RAILWAY CO. LTD.

WEST VAN. HOME BUILDERS LTD.

The West Van. Home Builders Ltd., a company recently formed, has its registered office in the Hay Block at the corner of 14th and Marine Drive. They are starting operations at once by the erection of three houses of the most modern design and finest workmanship on the subdivision situated at 17th and Inglewood. They expect to do considerable building this summer. The company has full power to clear ground, finance and build houses, and generally to do the work of a building company.

SPRAY FOR LECANIAN SCALE

8 lbs. Soap dissolved in 3 gals. water, while hot add 5 gals. of warm distillate oil and churn until an emulsion is formed.

For use (dormant)—Add 1 1/2 gals. of water to each gal. of emulsion. Keep distillate away from fire as it is highly inflammable and is best heated by placing it in hot water. —E. S. G.

The council on Thursday night made their annual \$200 grant to the West Vancouver Agricultural and Horticultural Association.

T. GRAFTON, 20 YEARS IN LIGHTHOUSE SERVICE

Thomas Grafton, keeper of the Point Atkinson lighthouse, entered the service twenty years ago last Monday, April 1st. He has been in charge at Point Atkinson for a number of years.

The first lighthouse, a wooden structure, was replaced in 1912 by the present one, which is built of concrete, and has a tower rising 130 feet above high water mark. The light is derived from coal oil vaporised under high pressure, and the prism or cone, rendered incandescent by the oil, is only a few inches long, although its flashes can be seen for miles. The smoothness of operation is due to the fact that it is floating in a body of mercury weighing 300 lbs.

Should moths get into a piano the best means of destroying them is to make up a mixture of turpentine, benzoline, and oil of lavender, and squirt this inside the instrument, by means of a scent spray or by any small syringe. Use seven parts of benzoline to one of turpentine and add a few drops of lavender—one drop to each ounce will be ample.
