It's a horrifying experience to have draperies come back from the drycleaner several inches shorter than when they were sent. But this never happens to customers of the North Shore Drapery Clinic.

You see, we have a special type of blocking and stretching equipment called a "Draper-form," which gently blocks in all of the pleats and carefully eases back the hemline to its original length.

And how do we know this original length? That's easy. We carefully measure each pair of draperies while we are inspecting them for weak spots, sun damage, and other potential problems before dry-cleaning. You see our drapery clinic service is much more than a cleaning service. Your draperies receive the same clinical care as a patient in the hospital. And that's why we have such spectacularly good results.

If you have a friend or neighbor whose draperies you particularly admire, ask if they haven't been cleaned at North Shore Drapery Clinic. Chances are they have, for our best advertisements are now hanging at the windows of hundreds of North Shore homes.

Our service can include complete takedown and re-hang if you wish, or simply a pick-up service at your door. Or you may bring your draperies directly to our store at 336 Park Avenue. We'll look forward to seeing you soon.
