cents instead of four, as predicted. The forest preserve rate has steadily increased since 1920 when the rate was six cents.

The sanitary district did the unexpected, and instead of retaining last year's rate of seven cents, as was predicted, it more than doubled last year's rate. The increase from seventeen to forty-one cents is due to floating of additional bonds, it is stated.

In other towns and villages in Cook county outside of Chicago, tax rates for the most part are considerably lower than those paid last year, according to the county clerk's figures. Lyons leads in reduction with a decrease of 10.56 per cent, while Harvey is highest in point of increase with 1.77. Evanston's rate, \$9.37, was the lowest for all north shore towns.

and Congressmen in Washington to vote for the Mellon Tax Reduction Plan.

You are asked to read the program and then start hammering away with your letters to Medill McCormick and William B. McKinley, senators; Richard Yates and Henry R. Rathbone, congressmen-at-large and Carl R. Chindblom, congressman from the tenth district of Illinois.
