

## Summer Classes Prove Popular at High School

The popularity of the New Trier High school summer school was shown in the results of a questionnaire recently answered by members of the student body of the school. There were 1,443 responses to the questionnaire or about ninety percent of the possible total.

Nearly half the students now in school have attended the New Trier summer school and many of them have attended more than one session. Eighty-one percent of those who attended summer sessions reported that they believed it benefited them, six percent were sorry they attended, and thirteen percent did not answer the question.

About one-third of the present Senior class has attended summer school two or more times, one-third has attended only one summer session, while the remaining one-third has never attended.

Mrs. Edward Armstrong of Glen Ellyn has been visiting Mr. and Mrs. Charles A. Mair of Wilmette.

## Construct New Bridges Over Drainage Channel

Further improvement of the North Shore channel by construction of four new steel and concrete bridges to replace existing inadequate structures spanning the channel at Devon avenue, Dempster, Touhy and Church streets, is provided in a contract awarded by the Sanitary District of Chicago to O'Brien Brothers Construction company.

Work is to begin immediately upon this program, as well as eleven paving projects included in the \$700,000 contract, to close up that many 500 foot gaps across the District's right-of-way along the channel.

"Better bridges over the North Shore channel at these localities have been a need of long standing," President T. J. Crowe stated. "The old spans are but fifteen feet wide, while the streets leading up to them have a width of forty feet, creating a 'bottle neck' which has seriously retarded traffic over a wide area.

"During construction of the bridges there will be no interference with traffic, which will be handled by building temporary wooden diversion bridges."
