

It's important to filter the oil in your motor

Pur-O-Lator and A-C Oil Filter

A Pur-O-Lator or AC Oil Filter cleans the oil by taking out the dirt, sludge, metal particles and other foreign matter. It makes your engine run better, saves oil, saves wear, saves repair bills.

Even if the oil is changed at frequent intervals, it becomes contaminated almost immediately unless an Oil Filter is used, as only by continuous filtration can the oil be kept clean.

Be sure to keep your oil clean—check your oil filter and renew the cartridge when the old one is filled with dirt.
