

CHRYSLER

Multi-Range Transmission

Down-Draft Carburetion

With the introduction of the new CHRYSLER "70" and "77," an entirely new conception of motoring is offered the public.

.

The Multi - Range Transmission and Down-Draft Carburetor are absolutely startling in performance.

.

You must drive one of these cars—and feel the difference—compared with any other performance you have ever known. No other car has these features. Many will have them next year, but why wait a year for CHRYSLER performance of today.
