

Not all the wealth of the
kings of old could buy the protection
at your command here

This 40,000-pound door, 16 inches thick, stands guard over the valuables that you place in the Safe Deposit Vault at this Bank. The vault walls are of steel-reinforced concrete, 18 inches in thickness, lined with half-inch inter-locking steel plates.

Protection that Croesus himself could not have purchased with all his riches. Protection that can be yours for as little as a cent a day. Protection that makes unnecessary risk-taking an expensive luxury!
