

GRAY

a fashion of infinite possibilities for the woman with a good color sense!

We are therefore sponsoring GRAY as a color of the first fashion importance for early spring wear

Our gray clothes have been chosen with especial care—so you find in them the delicate, warm, diaphanous grays that are becoming to most types of women. We recommend them, of course, with vivid contrast-colors such as

Skipper Blue	Coral
Flame	Chartreuse

—and we have provided suitable accessories to be harmonized with the gray coats, dresses and suits you will find here.
