ADVANCED
REFRIGERATION

It makes droopy,
dejected garden things
pertly crisp and sprightly!

What wonders the Frigidaire Hydrator works with wilted greens and languid vegetables!

Celery that has given up the ghost, so to speak, stands up like a Grenadier after a sojourn in the cold-moist magic of the Hydrator!

Lettuce that has lain down to die comes from its dewy, frosty depths crisp and succulent and newly inviting!

In the Frigidaire Hydrator all sorts of fruits and vegetables and salad greens find and keep just-out-of-the-garden freshness.

In most Frigidaire models the Hydrator is conveniently suspended so that food may be stored *under* and around it—it occupies that just-under-the-shelf space that is usually wasted.

What a great saving and what a great service are housed in the conveniently compact Hydrator!

★ ★ ★

The Frigidaire Hydrator to keep and restore garden-fresh crispness to fruits and vegetables is one of the many outstanding advantages of Frigidaire Advanced Refrigeration. There are many others. It is these major improvements, developed by Frigidaire, that have made household refrigeration so healthful, convenient and economical. We invite you to come in and learn all about them.
