Wilmette Optimists See Films About Telephones

At the regular Tuesday luncheon of the Wilmette Optimist club a unique program was given under the auspices of the local branch of the Illinois Bell Telephone company of which Edward G. Petry is manager.

Four reels of films descriptive of the various processes in the making of telephone equipment, as well as many views of the actual production of sound picture apparatus of which the major portion is made by the Western Electric company at the Hawthorne plant.

Another picture indicated how the commercial aviator is constantly in touch with some ground station that is continually advising him as to weather conditions ahead, thereby eliminating one of the hazards of aviation. Mr. Petry explained that this is only one of the many ways in which the telephone company is endeavoring to forge ahead in its work for the welfare of the public.
