### Realtors Submit Mortgage Loan Discount System

Possibility of establishing in this country a system which would serve the needs of existing home financing agencies such as the Federal Reserve system serves its member banks has been brought before President Hoover by Harry S. Kissell, of Springfield, Ohio, president of the National Association of Real Estate Boards. Mr. Kissell in laying the matter before Mr. Hoover and Secretary of Commerce Robert P. Lamont acted pursuant to a resolution adopted by the delegate body of the National Association of Real Estate Boards at its recent annual convention in Baltimore following a detailed four-day discussion of present important problems in the real estate field.

The delegate body of the Association, stating that it would not appropriately approve detailed plans prior to investigation through proper accredited channels, approved a study of the subject of establishing through federal legislation a system permitting the discount of mortgages on urban residences. It further asked for a study by the federal government of long term and short term credit as applied to the financing of home building and home ownership.
