

Your Bank and the Community

THIS INSTITUTION was founded upon the idea that the community needed a bank. The citizens felt a need for a safe and convenient place to keep funds, a means for transferring credit from one part of the country to another, a means of bringing together those who had money to loan and those who wanted to borrow. And so the bank which we now know as the State Bank and Trust Company was founded in 1874.

As our life has become more complex, the public has become more dependent on the services which the banks furnish—the need of this North Shore for efficient banks has become much greater. Operating with conscientious regard for the safety of funds entrusted to it, the State Bank and Trust Company is rendering a definite and necessary service to the North Shore as it has been doing for the past 58 years.
