## UNDERNOURISHED CHILDREN ENJOY HEALTHFUL RECREATION AT WILMETTE BEACH

Excellent work is being done by the Wilmette Health Center in their project among a group of about twenty undernourished children. Five days a week this group meets at the Wilmette beach to enjoy the benefits of supervised exercises, constructive play and swimming instruction. The group work is in charge of Miss Betsy Shapker, who has been donating her supervision and the services of her assistants. The above photo shows the group taking exercises.
