... WHAT PRICE JITTERS ...

From all parts of the country come strange and unusual noises by brassy-lunged gentlemen who have developed new ideas or repaired old ones on how to get the farmer out of the mud; how to get smoke coming out of blast furnaces; how to get two chickens in every dinner pail; etc., etc.

These gentlemen would free the world from trouble and sorrow and leave us happy, contented and prosperous.

All of this is only a bit of vote-gathering by the partisans of the Elephant and the Donkey who have, between them, ironed out everything, even to the best method of curing the jitters.

That last word is not used facetiously, for the jitters have swept over the land. The effect—particularly on prices—makes last year's costs resemble monsters.

It's not your fault but you might as well take advantage of present opportunities. Prices are advancing.

Look at the frame of heart-breaking reductions around this page.

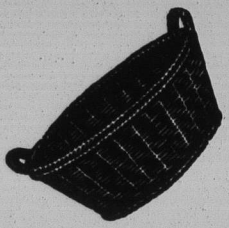

If there is one grain of Yankee shrewdness, Scotch sagacity or Hebraic intuition in your blood that doesn't stir at these bargains, then be examined—you have developed the jitters yourself.

If you are still unconvinced, you should make application for Congressional relief or take advantage of (Adapted from Walmer of Wilkesburg)
