Like a Fine Residence

All the qualities necessary to make a real home are found in our establishment. In appearance, in furnishings, and in accessories, we have a home like a residence of the finer type. And these features, we believe, make our funeral home a real temporary home in time of need.

Anyone who so desires may make use of this funeral home. It was created for the use of those who want it.

Both are called Boxers. but— WHAT A DIFFERENCE

One lacks the punch and is a second-rater, the other is a champion and "delivers the goods," yet they both look alike. There is often a similar difference between two lots of coal, both called by the same name.

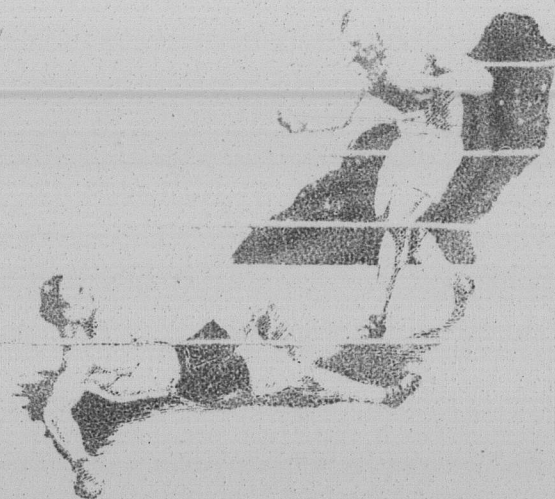

No matter whether you use soft, smokeless, or hard coal each kind has grades that are as far apart as a champion and a second-rater. The danger lies in the fact that the difference, great as it is, is hard for the average man to see. You can't tell second-rate coal until after you have paid for it, tried to burn it, and learned your lesson too late. Beware of so-called "bargains." Protect yourself by knowing your dealer.
