The most charitable thing that may be said for the revision contemplated for the administrative branch of the government is that it contain ambiguities. It seems to be quite plain, however, in the matter of depriving the Village manager of the authority to which our accepted form of government entitles him.

The Village board has intimated that it welcomes suggestions with reference to the proposed revised Village code.

We respectfully suggest, therefore, that the Village manager be given the actual and complete authority to which he is entitled by ordinance. with emphasis on the fact that such authority include the power to ap+ point and remove from office the superintendent of public works, the fire marshal, the chief of police, the health commissioner, and all other administrative officers and employes for whom he is by ordinance respon-sible to the president and board of trustees. This to include also the provision that, upon removing any such officer, the Village manager shall submit to the board of trustees at the next meeting following such removal a statement showing that such removal has been made with the reasons therefor.

If we are to retain the Village Manager form of government, let's put it to work full tilt! Let us not lay ourselves wide open to the pernicious evils of spoils politics.

Action by the Village board on a matter of such tremendous importance as this should not be rushed through at its next meeting. It deserves and should get the most painstaking consideration.
