

Comfort in Warm Weather

Now that warm weather is approaching, coolness and comfort are again important things to think about. It is typical of this firm that we prepared for summer days a long time back.

We have equipped our funeral home with modern devices to keep air cool, clean and fresh no matter what the outside temperature. Clients prefer to use our chapel rather than the residence for summer services because of this.

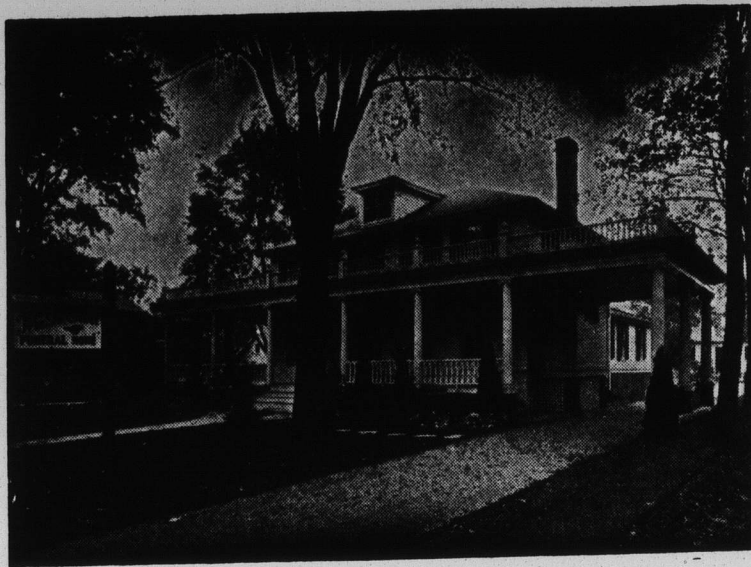

Despite its many conveniences, there is no extra charge for the use of our funeral home. Its facilities are one of many reasons why we have long maintained unquestioned leadership in this community.

*When you know the facts
about the **COOLERATOR**
you will accept no other kind!*

★ The COOLERATOR does more than just provide cold temperature. It retains in the foods the vital food juices and flavors. It provides washed, purified air. It requires re-icing not more than three times in two weeks. It uses far less ICE.

No matter how small the amount of ICE, the temperature is always the same in the COOLERATOR.

The housewife of today demands much of her Refrigerator. She wants a Refrigerator that will use less ICE. The Coolerator does this. She has heard that an Electric Refrigerator dries out foods. The Coolerator, with its patented feature, is scientifically designed to retain food juices and flavors. The housewife wants an even temperature as ICE melts. The Coolerator does this. Lastly, the housewife wants plenty of crystal clear, pure ICE cubes for all occasions. The COOLERATOR fills this need.

No other refrigerator, Electrical or ICE, now offered the public, fills all these requirements.
