## "HEATING PROBLEMS? We don't have any now"

Consumers Service Department has helped to solve the fuel problem in hundreds of North Shore homes. It can do the same for you.

If you are not getting the best results from your furnace, perhaps a slight adjustment, a change of fuel or a new method of firing will correct the difficulty. One of our combustion experts will gladly inspect your heating equipment and advise you.

There is no charge or obligation connected with this service and it may mean a decided improvement in your heating and a worth-while saving in your heating costs.
