## Tune-In Topics

"Peace hath her victories, no less renowned than war."

John Milton, famous poet, wrote that in the 17th Century. Today, three centuries later of (so-called?) civilization, nearly every major world power is at war. Peoples everywhere are asking: *Which Way to Lasting Peace?*

Those E-X-A-C-T words form the title of a broadcast series to begin Saturday, January 27, and outleted to the Chicago area through WIND (560) at 5:30 p.m.

*Which Way to Lasting Peace?* is to be a coast-to-coast program. Co-operating in its presentation will be fifty members of the nationally formed Commission to Study the Organization of Peace, of which Dr. James T. Shotwell, professor of History of International Relations, Columbia, is chairman. Program guests are to include eminent authorities in various fields of international relations. A non-partisan, truly American viewpoint will keynote the series.

To supplement *Which Way to Lasting Peace?* a current and deservedly recommended program, BULL SESSION (Saturdays, WBBM (770) at 3 p.m.) is to devote its usual unrehearsed, round-table discussion by university students to the consideration of the same question.

That the ideas of American youth so obtained may be representative of undergraduate opinion, the first five of the new BULL SESSION series will originate in New York, the next five from Boston, the final five from San Francisco. The following schools have been asked to take part in these discussions: Columbia, Fordham, N. Y. university, Princeton, Yale, Harvard, Radcliffe, Massachusetts Institute of Technology, Wellesley, Brown, the Fletcher School of Law and Diplomacy, Leland-Stanford, University of California (L. A.), California Institute of

## Children to Survey Village "Resources"

The public schools of Wilmette are carrying on a community resource survey in order to find out the citizens who have films, pictures, hobby collections, costumes, or other materials that might be of educational value, or those who would otherwise be willing and able to share their talents or abilities.

A questionnaire has been prepared by a committee of teachers and has been sent out to the homes of the school children. Citizens who are not approached by these school children and who wish to share in this cooperative project, were asked to call Mrs. Mildred Roberts, educational supervisor, office in Logan school, Central and Prairie avenues.

Technology, and the University of Southern California.

It is to be hoped that those in unadmitted control of the destiny of the man on the street will heedfully listen to these two examples of broadside opinion. The alert civic-minded of the citizenry will be regularity dialers. Those of the it's-all-a-mess, what-can-you-do-about-it ilk may be counted upon to show their usual congenital indifference.

### And PARENTS?

Why, with the futures of fine young boys and girls as part of their dreams and plans . . . but of course, they'll be listening-in!

### THE DIAL DETECTIVE

ADULTS—  
MEET MR. WEEKS (The Human Side of Literature) WENR (870) Tuesdays 8:30 p.m.

## Christian Science Churches

"Life" was the subject of the lesson-sermon in all Churches of Christ, Scientist, on Sunday, January 21.

The golden text was, "This is the record, that God hath given to us eternal life, and this life is in his Son" (I John 5:11).

Among the citations which comprised the lesson-sermon are the following from the Bible: "O bless our God, ye people, and make the voice of his praise to be heard: Which holdeth our soul in life, and suffereth not our feet to be moved" (Psalms 66:8, 9).

The lesson-sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Eternity, not time, expresses the thought of Life, and time is no part of eternity. One ceases in proportion as the other is recognized. Time is infinite; eternity is forever infinite. Life is neither in nor of matter. What is termed matter is unknown to Spirit, which includes in itself all substance and is Life eternal" (p. 468-9)

## Combines Lecture With Tour at Field Museum

A new lecture procedure is employed by Paul G. Dallwig, the layman lecturer of Field Museum of Natural History, in dramatizing "The Romance of Diamonds from Mine to Man," which he will present, "in four acts," at the museum on Sunday afternoon, January 28, at 2 o'clock.

Gathering his audience in the museum lecture hall, Mr. Dallwig will narrate the story of the finding of diamonds in Africa, the diamond rush, the clashes with the natives, and other events in the development of diamond mining as an industry.

He then will conduct the party on a tour of the museum's halls of gems and geology, illustrating through the exhibits other facts and features about diamonds.

Because of the heavy demand for accommodations, the museum requires that reservations be made in advance, by mail or telephone. Attendance is restricted to adults. Admission is free.

On the following Sunday, February 4, Mr. Dallwig's subject will be: "Prehistoric Monsters in Nature's March of Time."

## Crook's Nook Cagers Defeat Rangers 48-32

In a return game, the Crook's Nook basketball team defeated the Winnetka Rangers at the Joseph Sears gymnasium in Kenilworth on Thursday evening of last week by a score of 48 to 32. The Rangers had previously defeated the Kenilworth quintet. The Crook's Nook team has been entered in the Chicago Catholic league schedule.

## Sea Scouts

By Tom Gatles

### FORMAL INSPECTION

Monday's meeting was the big event of the formal inspection of the personnel of the Sea Scout Ship "Ouilmette." The officers who "put us through out paces" were headed by Commodore W. C. Huggins, who was flanked by Jack Banks, assistant Sea Scout executive, John W. Davis, a member of the Sea Scout rating committee, and Don Teisberg, field Scout executive.

The object of this event was to witness our activities in our regular ship meetings, with the intention of comparing us with neighboring ships. As a result of our showing here, and our activities during the preceding year, we will receive a rating which will determine whether or not we retain our position as North Shore area flagship.

The inspection consisted of our going through a sample meeting, in-

cluding a scrutiny of uniform, insignia, posture, and etiquette.

Friday evening, January 26, all Sea Scout Ships of the North Shore area will gather at Highland Park to participate in the Commodore's ball. Included will be a bridge of honor and comparative inspection of all ships' personnel.

The bridge of honor will include a presentation of advancement certificates to Sea Scouts who have risen in the ranks during the past season.

The inspection will require all ships to be "on their toes," for competition will be keen in an effort to make a good impression toward becoming flagship of the area.

### Guests

A guest meeting will be held Monday evening, January 29, at 1150 Wilmette avenue. This is to acquaint possible recruits with the members and quarters of the ship.

All members were requested to bring friends interested in this phase of Scouting, and others not personally invited are herein welcomed to attend. The program will include either motion pictures or tests of nautical skill which anyone can comprehend.

### Contest

Skipper Fred Mass is successfully directing the issuing of "make-believe" money as an indication of successfully fulfilling the requirements of the contest now in progress. This money is issued for scheduled attendance, correct uniform, advancement, dues paid on schedule, work done toward improving the ship's equipment, and accomplishment of assigned services. The results will be prizes worthy of the effort put forth toward obtaining them.

## Tranquil Bermuda

Bermuda News Bureau

Tranquil Bermuda, untouched by the hustle and bustle of the outside world, is represented here by one of its most typical spots, Flatts Harbour, located just below the Aquarium. In the foreground are a cruiser and the two-masted ketch on which Curator Louis Mowbray explores the depths of Bermuda's colorful waters for exotic new specimens. The boats stand out against a backdrop of ever green hills studded with the white-roofed, pastel houses of Flatts Village.
