Thunder Bay Arts Council Concerts in the Presents

W.C. Lewis has played harmonica since his youth and finds it a convenient instrument to carry while he is driving those big rigs. He has been busy in the recording studio making a cd of original, contemporary and authentic blues. He's the real deal. Wait til you hear some of his new songs. His vocals sure remind you of Fats Domino.

Dan Ager and friends

Chris Douglas

Greg Adamus

Lloyd Douglas

August 15, 1995

DAN AGER has traveled with many popular recording artists such as Freddy Fender, been managed by Garth Brooks booking agent and now returns to Alpena to continue his music. He plays with Freeman Cowger and Pretty Busy bands in the area. He attended Olivett College after graduating from Alpena Schools. A big thank you to Danny for bringing all this talent together on our stage tonight.

LLOYD DOUGLAS has become a legend, and so young. He can play banjo, fiddle, guitar or any other instrument even tho he says he doesn't play many wind instruments. It is an honor to have the two Douglas boys on the same stage. Lloyd travels to Alpena each weekend during college at CMU to play with Trik Ryder Band at the Hiway.

GREG ADAMUS is an assistant principal at Alpena High but will never give up his music. His father had his own band in Detroit when Greg was growing up so his love of music goes way back. He plays drums, piano and sax whenever he gets a chance....now which instrument will he play tonight? He studied with Yusef Lateef last summer improving his musicianship even more.

CHRIS DOUGLAS is starting his third year at Wayne State University, graduating from Alpena High. We in Alpena are so very proud of Chris and Nate who both received scholarships to WSU in jazz studies. Chris is one of the most talented bass players in the Detroit area...sometimes too much in demand. He has been known to teach bass and shares the family talent of being able to play a variety of other instruments. Thank you for sharing your love of music with us.
