Introductory

The Alpena City Directory for 1914 is herewith submitted, the publishers feeling confident that the information contained herein will be found as complete and accurate as it is possible to make it in a work of this character.

The Directory contains a list of the citizens of Alpena, alphabetically arranged, telling their business, location of business and residence. It gives the style of the firms and the individual partners. It contains a complete Classified Business Directory of all trades, professions and pursuits, making a special trade directory of each business and profession. The earlier pages contain what is technically termed "Miscellaneous Information," embracing the city government, county officers, township officers, State officers, lists of banks, churches with location, name of pastor and hours of service; convents and private schools, hospitals, incorporated companies with location, date of incorporation, capital and officers; miscellaneous societies, the military, newspapers, postoffice data, public buildings and halls, public schools with lists of teachers, railroads, secret and benevolent societies, labor unions, steamboat lines, United States offices, ward boundaries and other useful information.

A special feature of the Directory is the House and Street Directory, commencing on page 41. It comprises a list of the streets arranged in alphabetical order and described by giving the point of commencement and ending of each street and its line of general direction, the intersecting streets being shown in prominent type. The number of each building is given in numerical order and opposite such number is placed the name of the occupant, while the profession, business, etc., of individuals and firms are given at their respective places of business.

This book, forming as it does, a complete compendium of the city of Alpena, is placed by the publishers in the Directory Libraries of all the important cities in the United States and Canada, where it can be consulted by non-residents who contemplate a visit or removal to Alpena or the investment of capital. It is in this way that the Directory becomes an invaluable advertising medium for the city it represents.

In acknowledgment of the patronage bestowed and the many courtesies extended in the compilation of this work, we wish to extend our thanks.

The local rate is applicable to parcels intended for delivery at the office of mailing or on a rural route starting therefrom.

It will be observed that the rates of postage are largely reduced and that the limit of weight is increased from four to eleven pounds. Parcels will be delivered at all free-delivery offices and to patrons residing on rural and star routes; they may be registered and may be accorded special-delivery service on payment of the usual fees, and they may be insured against loss in an amount equivalent to their actual value, but not to exceed \$25, upon payment of a fee of five cents. Any stamps may be used on all parcels, and they may be mailed in quantities of not less than 2,000 identical pieces without stamps affixed, the postage being paid in money.

Do you realize that a City Directory advertisement is a testimonial to the permanency, the stability, of the advertiser?

That's the sort of concern all of us want to patronize, because we know when they sell us merchandise they are behind it in every way, today, tomorrow, and for the years to come.

"Fly-by-night," "fire-sale" and other temporary or "get-rich-quick" concerns rarely appear in the City Directory.

And it is a noteworthy fact that the concerns which advertise one year in the city directory are there again next year. 90% of directory advertising is renewed.

Directory advertising, is profitable. In connection with the classified business headings it is doubly effective.

May we explain how and why it will pay you?

ALPENA CITY DIRECTORY

MISCELLANEOUS INFORMATION

HOUSE AND STREET DIRECTORY.

The streets are arranged in alphabetical order, the intersecting streets being shown. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupant householder.

The profession, business, etc., of individuals and firms are only given at their respective places of business.

Chisholm street is the dividing line for all streets running North and South, and Second avenue for all streets running East and West. The system adopted is the same as used in Philadelphia and other large cities, known as the "decimal" system—one hundred numbers being allowed for each block. In cases where vacant lots, etc., occur, the usual number have been allotted them.

Note—Numbers in parentheses, viz: (1246), denote that the houses are incorrectly numbered, but their placement on the guide between the intersecting streets is correct. Double numbers, as 610 (910), denote that the number in parenthesis is on the house, but the number preceding is correct.
