INTRODUCTION.

Yielding to a general demand for an Alpena Directory, the publication of this, the first volume of the work, was undertaken. It was done with the belief that the service would be appreciated, and would reflect credit on the city as well as on the publishers. The information has been collected and compiled by thoroughly competent persons, although more than ordinary difficulties have been encountered, chiefly from the fact that the city is unnumbered, and, in the outskirts, the names of the streets are, in many cases, not known to the residents on them, and houses are frequently so situated as to make it almost impossible to locate them accurately, at the same time the publishers have in no sense relaxed their efforts or spared expense to make it come up to their promise and the public expectation. The plan of the work divides the information contained in the book into four parts, the first 100 pages are devoted to a description of the city, miscellaneous information, embracing a street guide, city and county officers, church directory, list of secret societies, steamboat lines, and many other useful items. From page 101 to 326 will be found the alphabetical list of residents in the city; this is followed by the names of those living in other parts of the county, and the whole is supplemented by a complete classified business directory containing the names and addresses of all persons engaged in business or the professions, arranged under the headings to which such business entitles them. As an addendum, a classified list of firms located in other cities who are subscribers to the work will be found.

The portion of the work devoted to the city of Alpena contains 3,568 individual names, and this, using a multiple of 3, which is lower than that usually taken by directory publishers, gives a population of 10,704; the county portion contains 779 names, equal, by using the same multiple, to 2,707 inhabitants, making for the city and county a combined population of 13,411. As the U. S. census, taken in 1880, gave the entire county 8,778 inhabitants, it will be seen that the proportion of increase during the past three years has been nearly 50 per cent; a better showing, it is thought, than can be made by any other county in the state.

To those who have patronized and encouraged this publication thanks are warmly extended.

R. L. Polk & Co.'s
ALPENA DIRECTORY.
1883.

MISCELLANEOUS DEPARTMENT.

Alpena, the judicial seat of county of same name, which, bordering on Lake Huron and Thunder Bay, in the northeastern division of the State of Michigan, comprises an area of 580 square miles. The surface of the county, which is nearly level, is interspersed with large forests; the manufacture of lumber is the principal interest. The county is divided into the townships of Alpena, Long Rapids, Ossineke, Maple Ridge, Wilson and Green, and borders on Montmorency, Presque Isle, Alcona and Oscoda counties. The city, which is situated in north latitude 45, and longitude 83.15 west of Greenwich, is distant, by navigable route, from Detroit, 230 miles, from Bay City 120, from Harrisville 30, from Au Sable 50, from Mackinac 120, from the Sault de Ste. Marie 220, from Buffalo 500, and from New York 940. Before entering fully into a description of the city of Alpena, as it now is, it may perhaps not be amiss to take a retrospective view of the past 40 years, going back as far as 1840, when the county, which at that time formed a portion of Mackinaw, was first laid out. In 1853 it was attached to
Cheboygan, and four years later was organized as a separate county. The first attempt to locate here was made in 1836 by Jonathan Birch, who, having found that there were excellent facilities for building a dam at the Rapids, commenced getting out lumber preparatory to erecting a saw-mill; he was not, however, allowed to put his design into execution, as the Indians, who were opposed to allowing any improvements to be made, forced him to abandon his purpose. It was not until 1856 that any permanent location was made here, when Messrs. Fletcher, J. S. Minor, J. K. Lockwood, E. A. Breckenridge, Oldfield and Daniel Carter, commenced a survey of the village, which was then called Fremont, commencing on what is now known as River street. Shortly after this the name of the place was changed to Alpena, and it has remained so ever since. In 1864, the total number of inhabitants was 874, and the town, which was already beginning to assume a more civilized appearance, consisted of 2 mills, a hotel, a few stores, 2 mill boarding houses, and about a dozen private dwellings on the north side of the river; and 3 mills, a court house, 3 stores and some 20 or 30 dwellings on the south side. The first lumbering was commenced in November, 1858, and to Mr. E. K. Potter belongs the honor of having scaled the first log and measured the first cargo of lumber that ever left Alpena. In the spring of the following year, the first steam mill was erected, and it commenced operations in the fall, since which time so rapid has been the advance made by this city as a lumbering and commercial centre that it would occupy too much space to give a complete record of the progress of the city.

The following report will show the amount of lumber manufactured during the past 5 years, and also the total cut of lumber, lath and shingles by each mill for 1882:

Total: 661,683,771
Next in importance to the lumbering business in Alpena come her fisheries. Attention was first paid to this most important branch of industry by Mr. Paxton, who in 1856 engaged extensively in Gill-net fishing, since which time the business has increased so rapidly that it now stands second only to the lumbering interest in the city, and there are at the present time 9 tugs and 25 sail boats in active operation. The total shipment of fish from Alpena for the year ending 1882 amounted to 2,868,000 pounds, while that for the present year will probably be much larger.

The principal fishing grounds are Sugar Island, Round Island, Misery Point, Patridge Point, North Point, Sulphur Island, and Ossineke, and the regular fishing boats remain out there during the season, run boats being employed to bring back each day's catch and to take out the necessary stores and provisions to the fishermen on the islands.

The first mail arrived in Alpena on the evening of January 17th, 1838, and was an event of great import-
two reserve pumps being kept in case of such an emergency. The crib is placed in the bay, and the wheel used is one of the largest in Michigan, and was the first of its size ever constructed. It is contemplated increasing the capacity to 4,000,000 gallons this fall, and with this intent, in view, several miles of extra piping have already been laid. The concern is managed by private individuals, and is not controlled by the city authorities.

There are, in all, 94 fire plugs distributed throughout the city, and thus, with the aid of its efficient fire brigade, it is rendered safe from any serious conflagration.

The fire was instrumental also in developing the farming interests of the county, as many who had lost their all by the calamity had no heart to make a fresh start at their old business, and turned their attention to clearing and cultivating the land, and with such success that they have now no desire to return to the city, as they feel they are doing better by farming than they could by resuming their former occupations. Among the most important factors in the commercial prosperity of the city must be mentioned Thunder Bay River, for without this the lumbermen would be obliged to haul all their logs to the mills, and consequently the cut would be much less each year or the expense very much greater.

The city is lighted by the Brush Electric Light, and it is in use on the streets and in most of the principal stores and offices; it was first introduced in the fall of 1880, and has since entirely taken the place of gas. The United States fish hatchery was located here in 1882, and has proved very successful. It is located on the corner of Water and State streets, and cost $1,500. It is supplied with 200 glass jars, each containing 200,000 eggs. The hatching is effected by the constant movement of the water, and the total number of young white fish shipped from here this spring was 30,000,000. These were planted in Thunder Bay and Lakes Michigan, Huron and Superior.

For several years the inhabitants have been agitating for a railroad, and it seems now as though at last their wishes were about to be fulfilled, as the Alpena and Bay City R. R. is being rapidly graded to this point, and grading is also going on from a point on the Mackinaw division of the Michigan Central. It is quite probable that one if not both of these roads will be completed to this point next year, and this will give a still greater impetus to business, affording as it will chances for more speedy and frequent intercourse with the outer world. It will also lessen the rates for transportation by increasing competition, and will thus in every way materially aid in the development of all the natural resources of the county.

Thunder Bay forms one of the best harbors on the shore, and as the stranger approaches Alpena by water, the view is one which, though it may disappoint the eager searcher after the picturesque, yet shows to the man of business indications of life, prosperity, and energy, and the singing of the saws as they rip up the logs, the rattle of the lumber trucks, noise of the engines, and the numberless steamboats and sailing vessels passing in or out constantly, must impress the practical mind most favorably. There are now in the
Don’t fail to see Burston the Tailor.

24 B. L.

city 15 steam lumber and shingle mills, 1 steam flour and grist mill, and 1 saw-mill operated by power obtained from the river. Two firms are employed in the wholesale fish business, buying the catch of all the smaller fishermen on the coast, besides employing the tugs and fishboats mentioned in an earlier portion of the sketch. There are in the city 10 church edifices, representing the Catholic, Baptist, Methodist, Episcopal, 2 German Lutheran, Polish Catholic, Norwegian, Congregational, and Hebrew denominations, and many of these buildings, notably the Catholic, Methodist and Episcopal, are new and handsome. Lodges of the Masonic, Knights Templar, R. A., I. O. O. F., A. O. U. W., G. A. R., K. of H., K. of M., Arbeiter Unterstützungs Verein, I. O. G. T., and R. T. of T. societies. Two engine houses, a handsome court house, a jail, 6 public and 2 private school buildings, 2 theatres, 2 breweries, 2 banks (the Alpena National Bank, and a private institution), 12 hotels, 5 drug stores, 3 boot and shoe stores, two machine shops (with foundries attached), besides music stores, grocery and general stores, meat markets, barber shops, bakeries, furniture stores, billiard saloons, tailor shops and clothing stores, photography galleries, and a very thorough representation of all the minor trades and business occupations. The city is well provided with members of the learned professions, lawyers, physicians, dentists, architects, surveyors, etc. The press is represented by 3 weekly and one monthly; the weeklies being the Alpena Pioneer, published by A. C. Teft; the Weekly Argus, J. C. Viall, editor and proprietor; and the Michigan Labor Journal, published by Williams & Metcalfe; all these are ably edited, bright and newsworthy sheets, and well deserve the support and patronage they receive. The monthly is published by the Trinity Guild, and is devoted exclusively to religious affairs.

The city was incorporated by act of Legislature No. 249, and the same was approved March 29th, 1871, the corporation comprising the following territory: The south-west quarter of section 13, the south half of sections 14, 15 and 16, the whole of sections 21, 22 and 23, the west half of section 24, and fractional sections 25, 26 and 27, in township 31, north of range 8 east. It was divided into three wards, the first and second being composed of all the land on the south side of Thunder Bay River, and the third all that on the north side of the river. The dividing line between the first and second wards was as follows: Commencing at a point in the centre of Thunder Bay River opposite a line between lots 7 and 37, in block 8; thence along said line to Third street, thence along the centre of Third street to Washington avenue, and west on said avenue to the centre of Thunder Bay River. The city was entitled to the following officers, who were to be elected by the people: Mayor, Comptroller, Recorder, Treasurer, 2 Aldermen from each ward, 3 Justices of the peace, 1 Supervisor from each ward, and 3 Constables. The first election, which was held on the first Monday of April, 1871, resulted in the return of the following officers:

Mayor—Seth L. Carpenter.
Treasurer—A. L. Power.
Comptroller—Donald McRae.
Recorder—A. Hopper.

School Books and Supplies At Centennial Book Store.
By no means the least of Alpena’s interests is its mercantile business. The fact of its being the supply and distribution point for nearly all the north-eastern counties bordering on Lake Huron, will of itself explain its large trade. No city of its size in the State transacts as much retail business during the winter months, nor is this a matter of surprise when we reflect that nearly all small villages, lumber and other camps, farming settlements, etc., between Au Sable, 50 miles south, and Cheboygan, 80 miles north, make this city their base of supplies during the period when navigation is closed and communication with the outer world is had only by stage lines. Had anything been wanting to prove conclusively the rapid growth of the city, surely the fact that the population to-day considerably exceeds 10,500 must silence all detractors; and it must be very gratifying to those public-spirited men who have spent some of the best years of their lives in endeavoring to advance her interests, to see her to-day recognized as the metropolis of Northeastern Michigan, and to be able to look forward to as bright and prosperous a future for their city as could be desired by her most ardent well-wishers, for surely nowhere can be found a happier combination of fertile resources and undaunted energy, which are the mainsprings of success, than in this pleasant little city of the lakes.

VALLEY SEWER PIPE WORKS,
Manufacturers of
Cement, Sewer, and CHIMNEY PIPE.
Tile and Cement for Sale.
CORNER FRANKLIN & THOMPSON STS.
(South of D & B C. Depot.)
EAST SAGINAW, MICH.

WHY IS CEMENT PIPE BETTER THAN OTHER THINGS
THAT HAVE ALWAYS BEEN USED FOR SUCH PURPOSES?
Because they are joined together in the most
perfect manner of any pipe now in use.
A Description of what Cement Pipe is,
how it is made, and what it is used
for, etc.: -
Cement Drain, Sewer and Well Pipe is manufac-
tured of a concrete, made from Hygienic Cement
and clean sand or gravel, very carefully mixed, and
molded under pressure around a smooth polished
iron core, by which the interior surface of the pipe
is left perfectly smooth and uniform thereby reduc-
ing the loss of flow from friction to the smallest
minimum.

We guarantee the Drain and Sewer Pipe a great superiority over brick or stone sewers or the
stone pipe, in regard to PERFECTION OF FORM AND FINISH, AND IN UNIFORMITY OF SIZE, AND
there being no dry joints and consequent loss caused by leaking. Cement Pipe has no joints to leak,
and is built with age and dampness until it finally becomes as HARD AS ROCK, AND AS LANTING AS THE EARTH IN WHICH IT IS LACED.

We make no second quality, and advertise only such sizes and styles as we manufacture.
All Orders will receive Prompt Attention. Special inducements to the Trade.

Mill Supplies AND LUBRICATION OILS. A FULL LINE AT POTTER BROS. & CO.
TO THE READER:

From the earliest organization of our Institution, we have claimed and exercised the right of speaking to the people through the press. To us there appears no more absurd than the rule of medical ethics which says, that no physician or surgeon, however skilled, can make those who suffer from a disease — of which he has made a special study — aware of the extent of the disease which appears to them.

But a few years ago, this iron-bound rule was rigidly observed; men of superior talent, who had expended years of toiled research, acquired a knowledge of the pathology of various diseases, lived and died in humble obscurity. The medical "code" denied to them the opportunity of losing those poor invalids, who were deprived of all skill, from the knowledge that they could cure them. Was there ever a more pitiful absurdity indulged in than this? Suppose you had made a study of heart disease and had the most unerring analytic skill in its diagnosis and treatment, and in the effects of the most appropriate remedies; would you see around you the victims of this disease, or would you refuse to tell them that their lives were in your hands, or that you could make them humanly possible? Could you see, unmoved, the tears of widows or hear without remorse the woes of orphans, to know your skill could not be exercised to end a bond and a loving father? We think not. You would, as we did, cast aside the fetters which bind the limbs of knowledge and proclaim your work to the winds of heaven.

THE PRESENT AGE OF PROGRESS.

The age of steam and of electricity, the age of the telegraph and the telephone, the age of starting inventions and stupendous achievements. "Mankind is moving." Civilization is advancing with gigantic strides and the present age which does not follow the impulse. Not even the medical world has escaped. No student now bound by the strictest laws and though true thought was rigidly excluded. Men arose whose reason recognized that THE OLD BLIND SHOT was A FAILURE, and whose minds grasped the fact that knowledge ever opens her doors to unprejudiced study. For a time the medical horizon was dark and troubled, but progress once started could not be stayed. Eager students followed in the footsteps of THE REFORMERS or sought out for themselves fresh fields of inquiry. In vain the orthodox clung to their "old ideas" in sanitarv years. The influence was gone. Every new idea was devoured, when reputable physicians and surgeons, men of high standing and experience, dared to advertise, dared to let the afflicted know of their skill, dared to let the people know that doctors are not all alike, that some are good, some bad and the majority indifferent, as regards their knowledge of the healing art. Spite of the fierce opposition these pioneers of medical advancement, with their master sprit and their indomitable courage, have paved the way for the once professionally outcast firm of "K.S.E."

With pride we view the result of this daring step and compare the social standing of our Institution with what was propounded by our opponents. A simple partnership has expanded into a MIGHTY ASSOCIATION.

Men of talent have gathered around us; a splendid building is raised up as our headquarters; thousands upon thousands of hopeless invalids come to us, attracted by our fame, and thousands of thousands of healthy men and women thank us for this great blessing without which life is dreary indeed. From every part of the country acknowledgments of wonderful cures now flow to us. From New York and Massachusetts, from Wyoming and Idaho, from the north woods of Michigan and Canada, and from the orange groves of Florida, there come daily to our office letters which overflow with the heartfelt gratitude of those whose skill has obtained a new lease of life.

Looking at these results, thinking of the homes made bright and the families made happy, and with the standpoint of our own earnest business success we ask you reader, ARE WE NOT JUSTIFIED IN ADVERTISING?

Our staff now consists of eighteen skilled and experienced physicians and surgeons, the various diseases which we treat are assigned to those most skilled in their pathology. We are thus enabled to give to every case the most painstaking care and attention, and to keep pace with the ever-growing demand upon our time and skill.

CHRONIC DISEASES AND DEFORMITIES

Are our specialties, and we say most unreservedly that no similar institution can show such a brilliant record. Bronchitis, Cataract, and Cancerous diseases, Nervous Debility, Diseases of the Heart, Head and Lungs, Liver, Kidneys and Bladder, in fact, countless complaints of every nature and name are daily treated by us with the most gratifying success. In the treatment of DEFORMITIES our surgeons have no equals, and we assert and challenge the denial that the majority of the afflicted ones who are brought upon our streets can be cured or greatly benefited by placing themselves under our care. The best surgical operations in the country are performed by our members and we truthfully say that in no case did an operation performed by us fail in being entirely successful. An operation, however, is only rewarded when all other means would be inefficient at the same time.

We have now given you some idea of our position and our aims. In a word, we claim the right to let people know what we can do and to employ every known means to THE AID OF THE MAN SUFFERING. So great has been the success which has attended our business that we long agt found it impossible to keep pace with it, without some method of reaching ourselves to direct, communication with these thousands of sufferers who are unable to visit us in Detroit. We therefore visit at regular intervals the chief cities and towns of Michigan, Indiana, Ohio, New York, Wisconsin, Illinois and Canada. We have also brought our method of treating by correspondence, to a positive science, and if you are suffering from chronic diseases, or deformities, you urge to write us at once.

ALABASTINE
A Superior Substitute for Kalsomine, Wall Paper, &c.

Alabastine is a Cement,
And is the Only Preparation based upon the proper principles to constitute a Durable Finish for Walls,
And is Entirely Different from all other Preparations Applied with a Brush.

It can be Mixed and Applied by Any One.

<table>
<thead>
<tr>
<th>Color</th>
<th>Samples of Tints</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td></td>
</tr>
<tr>
<td>Brown</td>
<td></td>
</tr>
</tbody>
</table>

Ready for Use by Adding Hot Water.
Fifty cents worth of ALABASTINE will cover 100 square yards of average wall with two coats; and one coat will produce better work than can be done with one coat of any other preparation, on the same surface.

ALABASTINE IS THE BEST FINISH FOR ALL THE FOLLOWING SURFACES:
A Soiled "Hard-Finish,"
PAINTED WALLS, WOOD CEILINGS, OVER OLD WALL PAPER,
On Brick, or on Rough Boards, Rough Plaster, &c.

WETTING ALABASTINE DOES NOT SPOT IT.
Put up in 5 lb. Packages, 20 in a case, and in Barrels and Half-Barrels,
MANUFACTURED ONLY BY THE
ALABASTINE CO.,
M. B. Church, Manager.
ALABASTINE.

While Alabastining is superior to all other ways of refinishing walls, such as Kalsomining, Papering, Painting, &c., it is also the best, cheapest, and by far the most durable finish

FOR NEW WALLS!

on a Sand Finish, or Brown Plaster.

It is well known that the finish known as "hard finish," or "putty coat," is not a durable one, and that many times it is soiled by workmen, and cracked by shrinking of timbers in the building, so as to require coating with something before the building is ready for occupancy, or soon after, as it is delicate and brittle and is put on good buildings before the finishing of wood-work, painting etc., and before the building is thoroughly dried out from being dampened and swelled by the wet plastering. While the Alabastine finish can be applied the last thing before moving in the building, and the cracks invariably found in the "hard finish," are avoided.

The coat of Alabastine is thin and not designed to fill and smooth uneven plaster, but one coat of tint, or two of white, mixed the same as for other surfaces, produces a beautiful, even finish, and the most durable, and may be renewed from time to time by inexperienced hands, and every additional coat adds to the strength of the wall; is hardened by age, and will not fade.

There are different ways of plastering walls for this Alabastine finish, according to the amount of expense and labor to be expended, as it will make a durable and handsome finish on one coat of common mortar, floated off and made comparatively smooth, and a better one on a good smooth sand finish as usually made for nice papering. A good finish is made by putting on the first coat of ordinary mortar and after it is dry put on what a plasterer would call between a sand finish and a "browning" coat, and float it off good or trowel it. This latter, two coat work, may be made a first class wall by taking care to "gauge" it just right with lime, (and sometimes a little stucco is used to set it), smoothing it when it is set just enough to work well, &c.

A good man who is used to the brush will put on from 300 to 400 square yards of this Alabastine tinted finish in a day, on the new wall where only one coat is necessary, if tinted, and the material will not cost more than $1.50 or $2.00, unless the wall is very rough.

The new work must be thoroughly dry before applying Alabastine.

Note.—The plasters do not all favor this process, as they think it will throw the finishing out of their hands, and that there will not be as much work to do if they do the Alabastining; but if they would take hold of it before the people, do it themselves or hire green hands, they would find it to their advantage, and many buildings would be finished with it that are now left without finishing.

CAUTION.

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting moneys in advance. BEFORE SIGNING AN ORDER, SEE THAT IT HAS THE NAME OF R. L. POLK & CO. PRINTED THEREON. We ask no payment until the work is delivered, and our solicitors have strict orders not to take payment for either advertisements or subscriptions.

Hardware, {Potter Bros. & Co.}
Stoves, etc.
CAUTION.

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting moneys in advance. Before signing an order, see that it has the name of R. L. POLK & CO. printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take payment for either advertisements or subscriptions.
