

STUDENT COUNCIL DEMANDS ACTION

Student Council Sends Delegation To J C Convention

The Student Council sent a delegation of five members to the Michigan Junior and Community College Student Association (M.J.C.C.S.A.) convention in Lansing on November 8th and 9th. A.C.C.'s delegates, Denny Fuerst, Roger Phillips, Bruce Cash, Bev Meden and Judy Lamble, acted only as observers at this convention because of the fact that A.C.C. is not a member of the association.

The purpose of this trip was to gain more information concerning the M.J.C.C.S.A. than had previously been known so that the Student Council could decide whether or not this association would be beneficial to our college. The main purpose of this association is to help member colleges solve problems which are pertinent to all Junior and Community Colleges such as: Teacher-Student Relations, Judiciary Problems, Fraternities and Sororities, Student Interest and Support, Social Codes, Student Government and Elections and Communications and Publications.

On Friday afternoon, delegates were registered at the Capitol Park Motor Hotel which served as convention headquarters. In the evening the delegates enjoyed a dinner at the

Capitol Park while being welcomed by the President of the Student Government at Lansing Community College (L.C.C.), and the President of the M.J.C.C.S.A.

Saturday morning started with a breakfast at L.C.C. which was followed by group discussions. The purpose of these discussions was to give the delegates of the various colleges an opportunity to discuss problems concerning their discussion group and make resolutions to be considered for adoption at the business meeting in the afternoon.

ACC Cheerleaders Chosen By Student Council

This year's cheerleaders were chosen by the Student Council because the turnout was so small that tryouts in front of the student body were considered a waste of time. Four female members were picked and the council made it known that the school owned a cheerleading uniform for any male student who might be interested.

The squad is headed by sophomore captain Karen Jorgenson from Cheboygan. Karen graduated from Cheboygan High School where she was a cheerleader for four years. She is a physical education major and plans to make teaching her career.

Representing the Oscoda area is sophomore Kathryn Rick. Kathryn is on the elementary teaching curriculum and plans to teach the first grade. As a member of the Student Council, she is an active person in school activities. Kathryn is a graduate of Oscoda High School.

Another sophomore, Marilynn Hartnell is from Alpena. Marilynn, a physical education major, plans to take up secondary teaching. She is a graduate of Alpena High School and is a past member of A.C.C.'s Student Council.

Lone freshman on the squad is Sylvia Stevens from Atlanta. Sylvia was a cheerleader for four years at Atlanta High

Students Tour Besser Company

On October 23, the Transcription 203 class, under the supervision of Mrs. Flora Stenzel, toured the Data Processing and Stenograph Departments of The Besser Company.

Mr. Compeau and Mrs. McKay, employees of the company, officiated as guides, explaining the basic functions of the Data Processing Machines and their role in our modern Age of Automation.

Among the various devices presented and demonstrated were: the key punch, the varifier, the sorter, and the programming boards used by IBM equipment. Machines explained and discussed in the stenographic department included the teletype, teleprinter, zerox, thermofax and the graphotype and addressograph.

As the students are presently studying business machines and their uses, the tour proved extremely interesting and profitable.

School. She is on a two year secretarial program here at A.C.C.

The cheerleaders hope that the students will stand behind them in supporting the Lumberjacks, as it is the fans who make the difference in the game - not the cheerleaders. The cheerleaders are there to organize the cheers and not to make all the noise.

On Sidewalks And Warning Lights

On Wednesday, November 6, 1963, the Student Council of Alpena Community College, by unanimous vote, went on record supporting a plan to construct a sidewalk between Central Hall and Besser Technical School and to install warning lights and/or caution signs at the crosswalks on Johnson Street. With the construction of the Besser Technical School, a definite need for these facilities has arisen. Alpena's hazardous winter driving conditions indicate there is a high probability that someone may be injured while crossing Johnson Street. This person could be you!

Many A. C. C. students have classes in both Central Hall and Besser Tech. In the winter months, only paved means of going between these two buildings will be the oval driveway.

Dennis Fuerst, Student Council President, reported that Dean Van Lare related, in a meeting with the Student Council representatives, that the oval driveway is intended mainly for vehicular traffic. In the winter months when drifting snow covers the driveway, a single lane of traffic is not wide enough to accommodate both pedestrians and vehicles.

The aerial photograph clearly indicates that there is no walkway connecting Central Hall and the Besser Technical School.

The students at A.C.C. appreciate our fine campus and the new technical school, but are these buildings to exist as separate institutions or as a single closely-knit educational unit?

Does it make sense that A.C.C. can have two, million dollar buildings and not be able to construct a sidewalk connecting them? We don't believe that it does.

All endeavors to find out who is responsible for the lack of a sidewalk have been in vain. The Student Council feels that it is necessary for them to reflect the interest of the student body by demanding immediate action on this problem.

If a sidewalk is not built before the arrival of winter, the Timber Cruiser has been advised that the administration plans to
