A.C.C. INTRODUCES CHINOOK SALMON

A.C.C. Temporary Facility for the incubation and rearing of Chinook Salmon.

Chinook Salmon will be introduced to Alpena Community College. A Fisheries Technology Program will be offered in an anticipated new fisheries building located on Campus.

Plans for a Fisheries Technology Program have recently been started at Alpena Community College by Dr. Elbridge L. Dunckel. The plans are to introduce and develop the Chinook salmon in the Alpena area. A fish permit has been obtained from Lansing for cultural and scientific purposes in the program.

The temporary facility by the Oxbow Stream must be readied by mid-November for the incubation and rearing of the eggs. Eighty thousand eggs, procured from Dr. Donaldson of the University of Washington, are approximated as the beginning number. An increase in the number of eggs is anticipated once the pilot study has been successfully completed. Water studies made by Mr. Richard Moreau and members of his summer institute classes indicated adequate waters at the Coho Hall facilities.

The National Science Foundation is giving financial aid through the Sea Grant College Act for the initial starting of the program. The Natural Resources Center will be financed by local, state, and national funds through the Higher Education Financing Act.

This project is an attempt to incorporate in ACC a Fisheries Technology Program with the results of a new program of study and the introduction of salmon to Thunder Bay.

In the last four years

Circle K Travels Convention Trail

The Circle K Club of Alpena Community College traveled to the Michigan District Training Convention in Rochester, Michigan, which was held on October 6th and 7th, at Oakland University.

The eight members attending were Mike Bushy, Dale Hibner, Tim Courter, Dan Gilmet, Mike Tracy, Randy Larson, Mike Turski, and Bob Young.

The Circle K men returned Saturday, the 7th of October.

Chinook Salmon Outclasses Coho

In November approximately 50 thousand Chinook salmon eggs will arrive at Alpena Community College.

For the first time in history, Alpena Community College will introduce Chinook salmon to Lake Huron for the purpose of propagation.

The Chinook salmon has an expected average weight of 50 to 65 pounds. The average weight of the Coho salmon is 10 to 14 pounds. The Chinook is stronger, faster and a better fighting fish than the Coho. The rods, reels, and lines needed by fishermen for Chinook are much larger and stronger than the rods, reels, and lines needed for Coho.

DAVID ANSPAUGH

A.C.C.'s new Economics teacher is Mr. David Anspaugh. He is a graduate of Albion College where he received a B.A. degree, and also Eastern Michigan University where he obtained his M.A. degree in Economics.

Besides teaching Economics and Physical Education, Mr. Anspaugh is head baseball coach and assistant basketball coach.

Fletchers Make Fish Property Available

Through the efforts of Dr. Elbridge L. Dunckel and Dean-elect Petosky, Alpena Community College will soon possess a fish hatchery as part of its facilities.

The temporary site for the hatchery is located on Long Rapids Road and is situated on what used to be part of Oxbow Farms, now owned by Tom and Ralph Fletcher. The Fletcher brothers have made this property accessible to A.C.C., at a nominal

Workers Needed At The Hatchery

Students of Alpena Community College are needed to start preliminary work on the fishery. The students will work on Saturdays under the supervision of Dr. Elbridge L. Dunckel and Calvin Town, a student at Alpena Community College. At the present time workers are cutting grass, moving lumber, and putting in glass.

For further development of the hatchery, people are needed who specialize in maintenance, such as painting, woodworking, and the installation of electrical appliances.

On the first day, seven students from the college, including two co-eds, worked at the hatchery indicating that students are interested in this project.

Styles Ask For Attention At ACC

Bright colors and bold prints and stripes set the pace in the fashion scene this fall. Colors range from the autumn leaf tones to pastels, while the prints and stripes have been created in many shapes and sizes.

Culottes, jumpers, sweaters, skirts and suits are among the popular items that have been seen on ACC's campus. Textured stockings and tights are popular this year, as more colors and patterns are brought out.

Student Gov. Has New Faces - Ideas

Each Wednesday at 12:00 noon, the Student Government meets in the conference room at Besser Tech.

This year they have a new advisor; Mr. Stanley Mrozek. He is the Western Civilization and Geography Instructor at Alpena Community College.

Members of the 1967-68 Student Government include the following students: President, Todd Brady; Vice-President, Donna Froberg; Treasurer, Rick Hamilton; Sophomore Representatives, Judy Oliver, Dave Sparks,

Students Plan First Yearbook

For the first time in the history of Alpena Community College, the student body will be able to recapture the year's highlights at A.C.C. in the pages of a yearbook.

Under the supervision of Diane Welbaum, editor-in-chief, and Sandi Hartnell, managing editor, the staff has been selling subscriptions and begun working on the yearbook. Mr. James Miesen, instructor of English Composition and American Literature, is acting as sponsor.

HOCKEY STARTS
Some of the students at A.C.C. are trying to form an ice hockey team. Anyone interested in playing is urged to contact Leith Helens in room 111 in the dorm.
