

Michael Pack keeps busy in the autobody shop.

Tina Weber of Oshawa keeps the computer keys moving.

In those early years, vocational training included shoemaking, baking, barbering, harness making and sewing and tailoring.
While some were dropped over the years, other training opportunities were added, including carpentry and cabinet making, print shop, welding, upholstery and maintenance shops.
In 1963, a decision was made to centralize all the technical training programs in one facility. With the help of the education ministry, as well as school superintendent Dr. J.G. Demeza and John Wesley Hodgson, head of the vocational program at the time, the wheels were set in motion for the new vocational facility.
