

Donini®

A TRADITION OF EXCELLENCE

For over forty years, the finest European traditions in quality chocolate manufacturing have been developed and enhanced by the Donini family.

Our North American plant produces bulk chocolate available in both solid and liquid form, depending on your needs, from industrial requirements through to the refinements of a pastry shop.

We also produce a complete line of fine chocolate coating that any pastry chef would be proud to work with. This includes our variety of chocolate moulds from round, square or marguerite cups to truffle shells, sticks, bits and buttons in milk, semi-sweet and white chocolate.
