Halla plant expands

Climate Control Canada Inc. purchased this production plant in late 1994 from former owner M&W Packaging. The German firm that built the plant ceased production there in 1995, but Halla made its purchase and was up and running with air conditioning components manufacturing by April, of 1996. The plant pictured here, on University Avenue north of Procter & Gamble, will undergo a massive expansion to triple its size and production capacity.
