"When you let the technology work for you - and the software needed to utilize all the network possibilities is in just about any desktop PC - the savings are huge and you find you're putting a better face forward with a better printed product," said Bell.

"We haven't gone into a single business and made installations where cost-savings haven't resulted. That, after all, is what business is all about."

On November 26, 5 - 8 p.m. and November 27, 9 a.m. - 5 p.m., OE Belleville will be celebrating it's 10th anniversary and their facility will be open to the public at Lahr Drive. The staff will be demonstrating all the latest in office copiers, facsimile and color imaging systems. Complete networks will also be demonstrated, showing printing, document scanning, retrieval and archiving as well as Francotyp Postalia mailing systems.

Bailey says, "This will be the ultimate business solutions show in the area. We will be showing products of interest to all businesses - of any size."
