

# Precision Optical

require special lenses to give the customer the best vision possible and that may require ordering the lenses. But the owners and employees of Precision Optical promise to go out of their way to find the perfect lens and that includes ordering specialty lenses from as far away as California and Germany.

Unlike some stores, Precision Optical deals with not just one supplier by many, and can therefore offer a multitude of frame styles. The walls in their two store are literally lined with them. They also make sure the styles are updated regularly so the customer can choose from the most recent. Many other eyewear products and accessories are also available at the Precision Optical stores, including all major non-pre-

scription sunglasses. As well as Serengeti, Oakley, Bolle, Ray Ban and several other regular sunglass lines they now have sun protective eyewear for children, starting from age six months and up.

And with the Bay View Mall location celebrating the first anniversary of it becoming a superstore, Precision Optical now offers greater convenience with its proven feature of quality work and friendly service.

Quinte Mall optician Bill Hunter checks the eyes of a customer. The staff is friendly and knowledgeable at Precision Optical, making it one of the leading eyewear retailers in the Quinte area
