

24— THE INTELLIGENCER, Friday, Sept. 30, 1977

### **Looking for markets**

V.L. Lewis, president of Stephens-Adamson Canada, stands before an experimental belt conveyor system developed by the company with the

federal government. The system, which is designed to move bulk materials at twice the rate of conventional conveyors, is an example of the technology

and expertise Stephens-Adamson hopes will make it a world-leader in production of bulk handling equipment.
