

The methods employed by CESO workers are those of recommendations and suggestions. Surveys are conducted on the request of these companies and the findings are then entered into a portfolio which is forwarded to a volunteer.

As in the case of Mr. Beeby, the volunteer's opinions concerning the portfolio are considered and a course of action is based on the recommendations.

Among the 51 products manufactured by Allwyn are electric refrigerators, electric and gas stoves, low pressure gas bottles, bus bodies, prefabricated steel houses, and steel furniture.
