

In the retirement of D. A. Sinclair as a member of the Board of Waterworks Commissioners, the board as well as citizens in general lose the services of a gentleman who was quite conscientious and loyal in fulfilling the duties of his office.

Dunc. Sinclair was a member of the Commission for twenty years and in that time he sanctioned and witnessed a period of advancement of the water works service and he added his wise counsel to the expansion of the system and the plant.

He was the successor to the later former Mayor of Lindsay, *D. J. McLean* who was chairman of the water works commission for several years. D. A. Sinclair also took his turn in serving as a chairman of the commission and his practical business experience was very helpful in the business administration of this particular board.

His friends will be pleased to hear that he is improving nicely from a recent illness.

* * *

One of the important municipal positions in Lindsay and in practically every municipality is that of Medical Officer of Health. Very few citizens actually realise the importance of the office despite the fact that the Board of Health and the M.O.H. have very wide authority which at times can become drastic and harsh, because of the duties involved in keeping the municipality enjoying a clean bill of health.

Dr. W. J. Crowe recently tendered his resignation as the Medical Officer of Health in Lindsay following twelve years of fine service. The duties of office are many and varied and highly important in connection with the welfare of

the municipality and the remuneration is termed a pitance.

There are hundreds of people who can testify to the fine service rendered by Dr. Crowe. He was a friend of many citizens.
